

How our Rates Compare

Average household in Peel consumes 290 m3 per year.

Where water and wastewater dollars go

- Ongoing maintenance and replacement of the water and wastewater systems
- The system of pipes and pumping stations that bring water to your property and the separate system that takes wastewater away from your property
- Leading-edge water and wastewater treatment
- Ensuring the accuracy of more than 331,000 water meters and their meter readings
- Local conservation authorities' initiatives that include drinking water source protection and reducing the effects of climate change

How to reduce your bill

You are billed according to how much water goes through the meter at your property, even if the water is consumed by an undetected leak. Fixing leaks and using less water will help reduce your bill.

Need tips on how to use less water and detect leaks? Visit watersmartpeel.ca

2018 Utility Rate Information

Water and Wastewater Rates

Cost of Water and Wastewater

Per cubic metre	2017	2018	Increase
Water	\$1.3212	\$1.4490	9.67%
Wastewater	\$0.9874	\$1.0210	3.40%

Combined average increase 6.54%

An average household with water and wastewater services can expect an increase of \$41 in their total billed amount in 2018.

Water bills issued as of April 1, 2018 will have an average rate increase of 6.54 per cent. The water rate will increase by 9.67 per cent and the wastewater rate will increase by 3.40 per cent.

The rate increase is largely driven by the need to invest in maintaining the infrastructure combined with inflationary impacts to operating costs. Despite the increase, the Region continues to maintain the lowest rates in the Greater Toronto Area.

Water

In the Region of Peel, we enjoy safe and clean drinking water that has been treated and tested to ensure it is of excellent quality. Water is billed based on meter readings reflecting water consumption at your property.

Wastewater

The wastewater charge is for operating the sanitary sewer system and treating wastewater. For residential customers connected to the wastewater system with metered water service, the wastewater rate is applied to 85 per cent of total water consumption throughout the year. The 15 per cent discount recognizes seasonal usage such as lawn watering and swimming pool maintenance, where not all the water is returned to the wastewater system.
