EXECUTIVE SUMMARY

Thurber Engineering Ltd. (Thurber) was retained by R.V. Anderson Associates Limited to prepare a Contamination Soil Assessment report in support of Stage I for the Schedule “B” Municipal Class Environmental Assessment study (Class EA) for proposed drainage improvements of Regional Road Highway 50 (Highway 50) between Mayfield Road and Healey Road in the Town of Caledon (Bolton), Ontario.

The “Site” consists of an approximate 2.4 kilometre (km) section of the Highway 50 right-of-way (ROW) that extends between Mayfield Road and Healey Road. A recent condition assessment of the drainage infrastructure along the Site has identified the need for rehabilitation of 17 entrance culverts (and crossings) on the east and west sides of Highway 50 within the Site limits.

The Contamination Soil Assessment was carried out through the completion of a Phase I Environmental Site Assessment (ESA) to identify evidence of actual and/or potential contamination at the Site and at adjacent properties within the Phase I Study Area which may pose implications on the management of materials generated during the proposed construction works. The Study Area for the Phase I ESA was considered to include surrounding properties within a 250 m buffer from the Site alignment.

The Phase I ESA was completed to provide preliminary information in support of the Class EA and was conducted in accordance with the general components of CSA Standard Z768-01 *Phase I Environmental Site Assessment* (April 2003, reaffirmed in 2016).

The Phase I ESA consisted of a desktop review and summary of select available historical records and a reconnaissance of the Site and Phase I Study Area from publicly accessible locations. The collected information was used to assess and evaluate past and present uses, and conditions and activities within the Phase I Study Area to identify potential sources of contamination that may impact the subsurface conditions along the Site alignment and the proposed construction works.

The findings of the Phase I ESA indicated that the Site existed as a two-lane roadway since at least 1946 (the first available aerial photograph) to approximately 1995 and 2005 when the road was widened in phases to four lanes to accommodate the development of the commercial and industrial operations within the surrounding area. The Phase I Study Area was developed to near its present configuration by 2015, with continual development of commercial and industrial facilities and transportation infrastructure to the current conditions since approximately 1960. Since at least 1985, the commercial / industrial properties have primarily included gas stations,

automotive repair and service garages, manufacturing operations, waste disposal facilities, commercial trucking facilities, retail stores and restaurants.

At the time of Site Reconnaissance, the Site was observed to comprise a four-lane roadway that was paved with asphalt within the travelled portion of the right-of-way. Gravel shoulders and vegetated roadside ditches and swales generally existed on both the east and west sides of the road. Properties adjacent to the Site were primarily observed to consist of multiple gas stations, autobody shops / car dealerships, commercial trucking terminals, retail stores and restaurants. Stormwater ponds with associated multi-use paths existed within the Phase I Study Area, as well as a CP Rail corridor which was observed near the northern portion of the Phase I Study Area. To a lesser extent, some institutional and community properties including churches, schools and education centers were observed, as well as parkland, and some residential and agricultural properties near the east limits of the Phase I Study Area.

Based on a review and evaluation of information obtained for the Phase I ESA, potential sources of contamination were identified at 75 locations on the Site alignment and within the Phase I Study Area. The historical and current contributors to potential sources of contamination at the Site generally involved the on-site presence of fill materials, typical vehicle spills within roadways and parking lots and the application of de-icing salts for the purposes of traffic and pedestrian safety.

A total of 74 potential sources of contamination were identified within the surrounding area that may have the potential for migration of contaminants onto the Site. The potential sources included gas stations; car dealerships and service garages; vehicle repair / autobody shops; vehicle storage/parking; car washes; underground and aboveground fuel storage tanks; transformers; printing and paint shops; various spills; multiple waste generators; lumber suppliers / factory / mills with potential wood preservation; chemical suppliers; testing laboratories; maintenance operations (equipment / vehicles); and the manufacturing of various products.

Forty-one of the potential sources of contamination were evaluated as a high risk for potential impact to the subsurface conditions underlying the Site.

The contaminants of potential concern generally included metals and inorganics, petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene and xylenes (BTEX), polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), polychlorinated biphenyls (PCBs) and organochlorine (OCs) pesticides.

A subsurface investigation involving sampling and analysis of soil and groundwater within the excavation depths for the proposed construction works would be required to confirm or refute the potential for contamination of the subsurface conditions underlying the Site.

1 INTRODUCTION

Thurber Engineering Ltd. (Thurber) was retained by R.V. Anderson Associates Limited to prepare a Contamination Soil Assessment report in support of Stage I for the Schedule "B" Municipal Class Environmental Assessment Study for proposed drainage improvements of Regional Road Highway 50 in the Town of Caledon (Bolton), Ontario.

The Site consists of an approximate 2.4 kilometre (km) section of the Highway 50 right-of-way (ROW) that extends between Mayfield Road and Healey Road. A recent condition assessment of the drainage infrastructure along the Site has identified the need for the rehabilitation of 17 entrance culverts (and crossings) on the east and west sides of Highway 50 within the Site limits.

The Contamination Soil Assessment was carried out through the completion of a Phase I Environmental Site Assessment (ESA) to identify evidence of actual and/or potential contamination at the Site and at adjacent properties within the Phase I Study Area which may pose implications on the management of materials generated during the proposed construction works.

The location and approximate limits of the Site are shown on Drawing 28262-1 and Drawing 28262-2.

The Study Area for the Phase I ESA was considered to include surrounding properties within a 250 m buffer from the Site alignment.

For discussion purposes in the report, the orientation of Highway 50 for the portion of the Site alignment is considered to be in a north to south orientation (i.e. Project North).

It is a condition of this report that Thurber's performance of its professional services is subject to the attached Statement of Limitations and Conditions.

This Report uses the International System of Units (SI Units).

1.1 Scope of Work

The Phase I ESA was conducted in accordance with the general components of CSA Standard Z768-01 *Phase I Environmental Site Assessment* (April 2003, reaffirmed in 2016). However, access to the adjoining properties was not provided and people with knowledge of the history of the adjacent sites with former or current potential sources of contamination were not available to interview. Therefore, the Phase I ESA involved the following tasks:

- Provide a general description of the Site;
- Conduct a desktop review of various historical records pertaining to the Site and surrounding properties within the Phase I Study Area, including an EcoLog database report from Environmental Risk Information Service (ERIS) to obtain an understanding of the Site, and past and present uses, conditions and activities within the Phase I Study Area;
- Conduct a “windshield-level” Site Reconnaissance to observe existing property uses and conditions at the Site and within the Phase I Study Area from publicly accessible areas;
- Review and evaluate the findings of the records review and Site Reconnaissance to identify properties within the Phase I Study Area with historical activities that may result in known or potential sources of contamination (PSC) at the Site and surrounding area; and,
- Prepare this Report documenting the activities, findings and conclusions of the Phase I ESA.

2 SITE DESCRIPTION

The approximate 2.4 km section of Highway 50 that comprises the Site extends between Mayfield Road and Healey Road in a northerly direction. The approximate project limits of the Site and the surrounding land uses are presented on Drawings 28262-2 and 28262-3.

The grade of the road alignment gently rises from the south to the north. The road surface near Mayfield Road is at approximate Elevation 226 m, and rises to approximate Elevation 238 m near the central portion of the Site. The surface of the road near Healey Road and the northern limit of the Site is at approximate Elevation 248 m. To the west of Highway 50 near the southern portion of the Site, the ground surface rises approximately 3 m from approximately Elevation 228 m to Elevation 231 m indicating a possible cut or fill placement.

At the time of the Site Reconnaissance, the Site was asphalt paved within the travelled portion of the ROW, with narrow gravel shoulders and grass, weeds and shrubs in the adjacent ditches and swales. The Phase I Study Area generally consisted of commercial and industrial use properties along the Highway 50 ROW with agricultural lands generally neighboring the commercial and industrial properties beyond the Phase I Study Area. A double track rail line operated and owned by Canadian Pacific (CP) Rail was observed to the north of the Site and the northern portion of the Phase I Study Area.

A review of the Natural Heritage Areas Map prepared by the Ministry of Natural Resources and Forestry identified that the Phase I Study Area exists within the Humber River watershed, which

is under the jurisdiction of the Toronto and Region Conservation Authority (TRCA). However, the Site and Phase I Study Area are not situated within the Oak Ridges Moraine or Green Belt, and no Areas of Natural and Scientific Interest (ANSI) were identified within the Phase I Study Area.

3 EVALUATION OF INFORMATION

The following factors were considered by Thurber during the records review and Site Reconnaissance to evaluate if an identified historical and current activity within the Phase I Study Area may be a contributor to a potential source of contamination at the Site, as well as the associated risk level for potential impact:

- Property use (i.e. agricultural/other, residential, parkland, institutional, industrial, commercial or community);
- Magnitude and nature of the activity [i.e. volume of spills, anticipated quantities of waste generation, presence of above ground storage tanks (ASTs) or underground storage tanks (USTs), quantities of polychlorinated biphenyls (PCB) storage, housekeeping practices, age of facility / operation, etc.];
- Duration of the activity (i.e. < 5 years, between 5 and 15 years, or > 20 years of operation);
- Location (i.e. hydraulically upgradient or downgradient from the Site);
- Contaminant characteristics (i.e. toxicity, mobility in the subsurface, etc.);
- Contaminant migration potential (i.e. soil stratigraphy, depth to groundwater, vapour intrusion, etc.); and,
- Exposure (i.e. anticipated receptor and distance from a potential source of contamination (PSC), transport pathways, residence time of contaminant in the subsurface, etc.).

4 RECORDS REVIEW

A records review was conducted by obtaining and reviewing the following information pertaining to the Site and surrounding properties located within the Phase I Study Area:

- Available past environmental and geotechnical reports pertaining to the Site or surrounding properties;
- Fire insurance records pertaining to the Site and surrounding properties from Opta Information Intelligence through ERIS, if any;
- City directories pertaining to the Site and selected surrounding properties from ERIS;
- An EcoLog database report from ERIS pertaining to the Site and surrounding properties which included searches of various federal, provincial and private source databases for records of potential environmental concern such as spills, former waste disposal sites,

registrations of underground/ above ground fuel storage tanks, environmental infractions and other relevant information in the Phase I Study Area;

- Aerial photographs pertaining to the Site and surrounding properties from ERIS and,
- Various topographic, geologic and hydrogeologic maps pertaining to the regional area that contains the Site.

The Phase I ESA did not include a chain-of-title search for any properties, detailed site inspections of each property, site interviews, or a Freedom of Information (FOI) request to the Ministry of Environment, Conservation, and Parks (MECP).

4.1 Environmental & Geotechnical Reports

No previous geotechnical or environmental reports were made available to Thurber for review. However, Thurber was involved in a limited geotechnical investigation for this project. At the time of this report, preliminary borehole information indicated that the travelled road consisted of approximately 0.2 m thick asphalt overlying road base materials of approximate 0.4 m thickness which were underlain by silty clay to clayey silt till-like soils.

4.2 Fire Insurance Plans

Fire Insurance Plans (FIPs) were requested from EcoLog ERIS at the time of record collection, however no FIPs were available for the Phase I Study Area. The Site and the surrounding area generally appeared to have been undeveloped or used for agricultural land, rural residential dwellings and farm structures until the mid-late 1980s. Publication of FIPs was discontinued in the 1970s.

4.3 City Directories

City Directories were reviewed to identify historical commercial and industrial businesses on properties within the Phase I Study Area. The reviewed directories covered the years of 2000/1999, 1994, 1989, 1984, 1977/78, 1972/73, 1965, and 1958. A copy of the City Directory Report is presented in Appendix A.

The listings provided in Table A may be associated with potential sources of contamination that were identified within the Phase I Study Area for the specified Directory years.

Table A: Summary of Relevant City Directory Findings

EcoLog Environmental Risk Information Services

Various provincial, federal, and private databases were searched by ERIS to obtain information for the Site and surrounding properties within the Phase I Study Area. The complete EcoLog database report, including a description of the databases searched and records found, is presented in Appendix B. The locations and corresponding relevant activities that were identified within the Phase I Study Area are summarized in Table B.

Table B: Relevant Findings from EcoLog ERIS Report

EcoLog ERIS Database Findings						
Municipal Address	Database	EcoLog Map Key	Findings	PSC ¹		
				Y	N	Comments
12833 Highway 50	SCT	175	Monterra Lumber Mills Ltd. Was listed as a manufacturer of various wood products / mill work. Established in 1991.	✓		A wood treating and bulk storage facility is located adjacent to the Site.
			UNITED LUMBER HOME HARDWARE was registered as a pesticide's vendor.			
			Monterra Lumber Mills Ltd. Was listed as a waste generator (ON1764100) from 1999-2011. Wastes generated include waste oils and lubricants, paint/pigment/coating residues.			
			UNITED LUMBER HOME HARDWARE was registered as a waste generator (ON5134408) in 2006. Wastes generated include paint/pigment/coatings residues.			
12760 Highway 50	GEN, SPL, PES, ECA	164	The Home Depot Canada was listed as a waste generator (ON9149515) from 2007-2019. Wastes generated include waste oils/sludges (petroleum based), waste compressed gases including cylinders, alkaline solutions, waste oils and lubricants, light fuels, wastes from the use of pigments, coatings and paints, chemical fertilizer wastes, misc. wastes and inorganic chemicals, acid solutions, other specified inorganic sludges, slurries or solids, halogenated pesticides and herbicides.		✓	The building is located approximately 240 m west of the Site and in the inferred hydraulically downgradient groundwater flow direction in relation to the Site.
			A spill occurred at this property in 2009, where an unknown quantity of fuel / hydrocarbons were released to a catch basin.			
			The Home Depot Canada was listed as a pesticide vendor.			
			The Home Depot of Canada received an environmental compliance approval for a 100 KW back up diesel generator.			
12730 Highway 50	GEN	148	THE FORZANI GROUP was listed as a waste generator (ON3628456) from 2014-2019. wastes generated include aliphatic solvents and residues.		✓	The building appears to be a commercial shopping center.
12612 Highway 50	SCT, GEN, SPL	103	The Caledon Enterprise was listed as a newspaper publisher established in 1884 (later Metroland Printing, Publishing & Distribution).	✓		A large spill of mineral oil to an underground structure was reported. as well as printing and manufacturing operations on the property which is adjacent to the Site.
			Flexopedic Mattress Inc was listed as a mattress manufacturer established in 1995.			
			North Hill Animal Hospital Professional Corporation was listed as a waste generator (ON8051832) from 2009-2019. Wastes generated include pharmaceuticals and pathological wastes.			
			A spill of 1100 L of non-PCB mineral oil was made into a Hydro One transformer vault in 2015.			

EcoLog ERIS Database Findings						
Municipal Address	Database	EcoLog Map Key	Findings	PSC ¹		
				Y	N	Comments
12599 Highway 50	GEN	92	Northpoint Veterinary Hospital Professional Corp. was listed as a waste generator (ON4797449) in 2018 and 2019. Wastes generated include pathological wastes.		✓	Animal health care clinic that is considered low risk to environmental impact.
12563 Highway 50	GEN	84	Globetrotter RV Rentals and Sales was listed as a waste generator (ON5808793) from 2002-2006 and (ON7669488) in 2018. Wastes generated include waste oils and lubricants.	✓		Sales, storage and repair of RVs and trailers were noted at this property located adjacent to the Site.
12553 Highway 50	EBR, CA, ECA	71	Vincent Dimauro was listed as approved for a commercial painting booth and associated discharge to the atmosphere in 2004.	✓		A paint booth and storage of bulk paints and coatings were noted at this property located adjacent to the Site.
12543 Highway 50	CA, ECA	68	Michael Mario Savo was given a new certificate of approval for an automotive paint spray booth for application of solvent based coatings.	✓		A paint booth and storage of bulk paints and coatings were noted at this property located adjacent to the Site.
12525 Highway 50	GEN	39	MapleCon Earthworks Ltd. Was listed as a waste generator (ON4156921) in 2009. Wastes generated include waste oils and lubricants.	✓		Possible laydown yard or servicing shop for equipment, located to the east and adjacent to the Site
12500 Highway 50	GEN	17	Go Vacations was listed as a waste generator (ON0797500) from 1986-1994. Wastes generated were not defined.	✓		Go Vacations appeared to be a recreational vehicle sales and rental lot adjacent to the Site.
12476 Highway 50	FSTH, FST	18	SRAA Inc. was listed as having three (3) underground double walled gasoline fuel tanks of 50,000L capacity and two (2) underground double walled diesel fuel tanks of 25,000L capacity. The tanks were installed in 2007.	✓		Fuel storage tanks located adjacent to the Site.
12465 Highway 50	EXP, SPL	13	Motor Home Vacations Canada was listed in the expired fuels safety facilities database. The location was previously a propane refill center.		✓	Propane storage tanks were previously located adjacent to the Site. The spills reported were releases of gas to the atmosphere and are not likely to have impacts on soil or groundwater at the Site.
12393 Highway 50	RST, FSTH, SPL, GEN, FST	26	Shamrock Petroleum was listed as having four (4) underground single walled gasoline fuel tanks of 22,730 L capacity and one (1) underground single walled diesel fuel tank of 22,730 L capacity. The tanks were installed in 1985.	✓		Multiple underground fuel storage tanks were present on the property located directly adjacent to the Site. Several spills of petroleum products were also reported.
			An unspecified volume of diesel fuel was spilled onto gravel by a tow truck (2004).			
			Diamond Towing & Float Service Inc was listed as a waste generator (ON3276724) in 2010. Wastes generated include light fuels.

			<p>Diamond Towing & Float Service Inc was listed as having one (1) underground single walled gasoline fuel tank of 22,700 L. The tank was installed in 1980.</p> <p>An unspecified spill was reported in 2019.</p>			
12380 Albion Vaughan Road	GEN	48	Banister Pipelines was listed as a waste generator (ON2881896) as of 2018. Wastes generated include aliphatic solvents and residues, light fuels and waste oils and lubricants.		✓	The property appears to be located over 200 m from the Site, and review of aerial photos indicates it was used as a laydown yard for storage of new pipe segments prior to pipeline construction.
12373 Highway 50	SPL	40	Approximately 2 L of gasoline was reportedly spilled in a ditch due to a vehicle accident and fire.	✓		The spill was reported to have occurred in the location of a proposed excavation on or adjacent to the Site.
12343 Highway 50	GEN, SPL	58	<p>Caledon Equipment Ltd. was listed as a waste generator (ON2263500) from 1997-2001. Wastes generated include waste oils and lubricants.</p> <p>Aggmin Equipment Ltd. Was listed as a waste generator (ON4933000) for years 2006, 2009-2012. wastes generated include waste oils and lubricants.</p> <p>Top Lift Enterprises was listed as a waste generator (ON4488007), (ON8157996) from 2012-2019. Wastes generated include waste oils and lubricants and oil skimmings and sludges.</p> <p>A spill was reported at Top Lift Enterprises in 2019. No volume or material spilled was indicated.</p>	✓		Sales, storage and repair of heavy machinery occurred at this property, which included a reported spill.
12295 Highway 50	SCT, RST, GEN	89	<p>ATTOGRAM Corp.. was listed as a manufacturer of pharmaceuticals and medicine.</p> <p>12 Flags Developments Ltd. was listed as having a fuel storage tank on the site.</p> <p>Albion Radiological Associates was listed as a waste generator (ON1724800) from 1993-2004. Wastes generated include organic laboratory chemicals and photo processing wastes.</p> <p>Astra Fertility Group was listed as a waste generator (ON2692398) from 2007-2015. Wastes generated include pathological wastes.</p> <p>Dr Essam Michael Medicine Professional Corporation was listed as a waste generator (ON2692398) in 2016, 2018, 2019. wastes generated include pathological wastes.</p>	✓		A fuel storage tank of unknown capacity was reported at the property located adjacent to the Site. Waste generators, and manufacturers of pharmaceuticals were also noted at this property.

			<p>Dr. Pratibha Kankaria Medicine Professional Corporation was listed as a waste generator (ON9673615) in 2015, 2016, 2018, 2019. wastes generated include pathological wastes.</p> <p>C.M. Weicker Medicine was listed as a waste generator (ON4443364) in 2018, 2019. wastes generated include pathological wastes.</p>			
12275 Highway 50	PRT, PES, GEN, EXP	95	<p>Cruise Canada Inc. was listed as having a private fuel storage tank with capacity of 1000L on the property. The expiry date was reported as 1995.</p> <p>Cruise Canada Inc. was listed as a waste generator (ON1289801) from 1998-2019. Wastes generated include aliphatic solvents, aromatic solvents, petroleum distillates, waste oils and lubricants.</p> <p>Cruise Canada Inc. was listed as having expired propane fuel tanks on the property.</p> <p>UNITED LUMBER HOME HARDWARE was registered as a pesticide's vendor.</p>	✓		Sales, storage and repair of RVs and trailers as well as a fuel storage tank were noted at this property located adjacent to the Site.
12182 Highway 50	FST	136	Petro V Plus Ltd. was listed as having one (1) double walled gasoline storage tank of capacity 100,000 L and one (1) double walled gasoline storage tank of capacity 50,00 L. The tanks were installed in 2016.	✓		Fuel storage tanks located on the property directly adjacent to the Site.
Highway 50 South of Healey Road	SPL	168, 178	<p>A natural gas leak was reported at the Consumers Gas CO. LTD. (1993).</p> <p>Evidence of petroleum product within a bell manhole was reported in 2006. Origin of the product is unknown.</p>	✓		The natural gas leak was reported as a gas release to the atmosphere (likely no impact to soil or groundwater), however the source of the sheen observed was unknown.
Highway 50 and McEwan Drive	SPL	110	A spill of 15 L of engine oil occurred as a result of a vehicle accident in 2008. The oil was spilled into the drainage ditch.	✓		A spill of petroleum products on the Site in the area of proposed excavations.
Highway 50 and Mayfield Road	SPL	190	A spill occurred as a result of a vehicle accident. 10 L of diesel was reported as spilled.	✓		Spill may have impacted the soil / groundwater quality in the area of proposed excavations.
Albion Road and Mayfield Road	SPL	199	A spill of Hydro Transformer oil occurred as the result of a car accident in 1992.	✓		The location of oil spill is unknown, however Albion Vaughan Road is adjacent to the Site.

68 Healey Road	SCT, GEN	186	Syntec Process Equipment Ltd. was listed as a wholesaler / distributor of industrial machinery, equipment and supplies and chemical and allied products. Established in 1993.	✓		The building appears to be a commercial / industrial space with garage / loading doors located at the rear. The operation included waste generation.
			JASNIL MFG. LIMITED was listed as a waste generator (ON1645700) from 1992-2001. Wastes generated include petroleum distillates.			
69 Healey Road	GEN	185	Pentad Construction Limited was listed as a waste generator (ON6136699) from 2009-2018. Wastes generated include waste oils and lubricants.	✓		Review of aerial photos indicates that machinery, mobile servicing equipment and scrap metals are stored in the yard at this property. The operation included waste generation.
73 Healey Road	SCT, GEN, EBR, CA, ECA	191	Green Valley Woodworking Ltd. was listed as a manufacturer of furniture, wood cabinets / countertops and other mill work. Established in 1989.	✓		A woodworking shop and waste generator with potential for wood treatment and coatings, as well as an approved paint spray booth and potential storage of bulk paints / coating materials.
			Green Valley Woodworking Ltd. was listed as a waste generator (ON5426259) in 2005. wastes generated include petroleum distillates.			
			Green Valley Woodworking Ltd. Received approval for the installation and operation of a paint spraying booth.			
81 Healey Road	SCT, GEN	200	4-Way Metal Fabricators Ltd. was listed as a manufacturer of sheet metal, ornamental and architectural metal products and general purpose machinery. Established in 1975.	✓		A metal-working shop was listed as a manufacturer of various metals and treated metals, as well as waste generation of paints, oils and solvents.
			4-Way Metal Fabricators Ltd. was listed as a waste generator (ON2464400) from 1999-2012. Wastes generated include aromatic solvents, alkaline wastes, waste oils and lubricants, paint/pigment/coating residues.			
730 Hardwick Road	GEN	202	Premium Fine Foods was listed as a waste generator (ON8516867) from 1986-1994 and 2007-2008. Wastes generated were undefined until 2007 where they included paint/pigment/coating residues, acid wastes, alkaline phosphates, inorganic laboratory chemicals, aliphatic solvents, petroleum distillates, waste oils and lubricants, organic laboratory chemicals, and amines.	✓		Commercial / Industrial building located adjacent to the Site. The operation included waste generation.
750 Hardwick Road	GEN	196	G. Cooper Equipment Rentals was listed as a waste generator (ON5440182) from 2015-2019. Wastes generated include petroleum distillates, waste oils and lubricants, aliphatic solvents, oil skimmings and sludges.	✓		Sales, storage and repair of heavy machinery occurred at this property located adjacent to the Site. The operation included waste generation.

				Y	N	Comments
			Peel Standard Condo Corp. # 852 was listed as a waste generator (ON8330415) in 2013. Wastes generated include aliphatic solvents.			
86 Pillsworth Drive	SPL	155	A spill occurred at this property in 2011, releasing approximately 115 L of diesel fuel to the ground and possibly entering a catch basin.	✓		The facility is located approximately 200 m to the west, but has the potential to impact groundwater towards the southern portion of the Site.
21 Parr Boulevard	EBR, CA, ECA, GEN	111	Nor Galaxy Group received an environmental approval for the installation and operation of a paint spray booth for application of paint and solvents to motor vehicles. Issued in 2011.	✓		A large commercial / industrial building with multiple waste generators and possible bulk paint/coatings storage located adjacent to the Site.
			Premier Stone Ltd. was listed as a waste generator (ON4376626) in 2018 and 2019. wastes generated include inert organic wastes.			
100 Agrocrop Rd	GEN	150	Agrocrop Exports Ltd. was listed as a waste generator (ON3212240) in 2019. Wastes generated include waste oils and sludges.	✓		The building appears to be a large warehouse and trucking terminal adjacent to the Site.
11339 Albion Vaughan Road	CA, PRT, GEN, FSTH, FST, EASR, PES	203	MUSCILLO TRANSPORT LIMITED received an environmental approval for a waste oil furnace in 1995.	✓		Presence of fuel storage tanks, machine repair shops, waste generators including halogenated solvents, and a pesticide vendor located on a property adjacent to the south portion of the Site.
			MUSCILLO TRANSPORT LIMITED was listed as having a 70,000 L private fuel storage tank.			
			MUSCILLO TRANSPORT LIMITED was listed as having one (1) single walled gasoline storage tank of 22,700 L capacity, one (1) single walled diesel storage tank of 22,700 L capacity and one (1) single walled diesel storage tank of 45,400 L capacity. The tanks were installed in 1990.			
			TANK TRUCK TRANSPORT INC. was listed as a waste generator (ON0169705) from 1996-2017. Wastes generated include petroleum distillates, organic laboratory chemicals, alkaline wastes, aliphatic solvents, halogenated solvents, oil skimmings and sludges, waste oils and lubricants.			
			BOLTON TRUCK & TRAILER was listed as a waste generator (ON2145100) from 1996-2001. Wastes generated include aliphatic solvents, waste oils and lubricants, petroleum distillates, oil skimmings and sludges.

			TransCanada Pipelines LTD was listed as a waste generator (ON9514807) from 2003-2019. Wastes generated include paint/pigment/coating residues, specified inorganics, inorganic laboratory chemicals, aromatic solvents, aliphatic solvents, petroleum distillates, light fuels, heavy fuels, polymeric resins, halogenated solvents, halogenated pesticides, PCBs, oil skimmings and sludges, waste oils and lubricants, detergents/soaps, organic laboratory chemicals, organic acids, amines, non-halogenated pesticides, waste compressed gases, inorganic acid wastes, acid wastes, alkaline wastes, alkaline phosphates, sulphides.			
			Bulk Transfer Systems Inc was listed as a waste generator (ON4242686) from 2006-2013. Wastes generated include waste oils and lubricants.			
			Best Choice Express & Delivery, Ltd was listed as a waste generator (ON5280772) from 2007-2019. Wastes generated include waste oils and lubricants.			
			National Helicopters Inc. was listed as a waste generator (ON5662739) from 2007-2019. Wastes generated include waste oils and lubricants.			
			Toll Leasing Ltd. was listed as having an expired fuel storage tank on the property.			
			Bulk Transfer Systems Inc. was listed as having one (1) single walled gasoline storage tank of 22,700 L capacity, one (1) single walled diesel storage tank of 22,700 L capacity and one (1) single walled diesel storage tank of 45,400 L capacity. The tanks were installed in 1990. (previously MUSCILLO TRANSPORT LIMITED).			
			TITAN DISPOSAL LTD. Received approval for a waste management system.			
			2030863 ONTARIO INC. was listed as a pesticide operator (approved in 2019).

4.4 Aerial Photographs

Aerial photographs were reviewed from an EcoLog ERIS search, which referenced several database searches. The available aerial photographs were reviewed on an approximate 5 to 15-year interval from the earliest available year (1946). The reviewed photographs are presented in Appendix C.

The scale of the photographs did not permit a detailed study of the Site and surrounding properties; however, the following observations were made with respect to the presence of buildings and structures, and general land uses and activities on the Site and surrounding properties within the Phase I Study Area, as presented in Table C.

Table C: Observations of Aerial Photographs

Aerial Photograph Observations		
Year	Site	Surrounding Properties
1946	Regional Road 50 within the Site alignment existed. The Site alignment appeared to be two lane road, with farmland and occasional residential dwellings in the Phase I Study Area.	Surrounding properties primarily consisted of agricultural lands, with associated farmhouses randomly distributed on both sides of Regional Road 50.
1954	No significant changes observed since 1946.	No significant changes observed since 1946.
1960	No significant changes observed since 1946.	Development was noted in the central region of the alignment to the west of the ROW, and in the southern region to the east of the ROW. The additional buildings appear to be residential dwellings.
1974	Paving or widening of the lanes for Highway 50 appears to have occurred. Highway 50 appears to consist of 2 lanes	Some additional development was noted in the central region of the alignment to the east of the ROW, and in the southern region to the east of the ROW. The additional buildings appear to comprise industrial or commercial use. Additional areas appear to be cleared for future development.
1985	No significant changes observed since 1974	Additional development was noted in the central region of the alignment to the east of the ROW, and in the southern region to the east of the ROW. The additional buildings appear to comprise industrial or commercial use. Additional areas appear to be cleared for future development.
1995	Highway 50 appears to be widened from 2 to 4 lanes between the central portion and the northern limit of the Site at Healey Road. The southern portion of Site appears to remain a 2 lane road.	Residential buildings / farmhouses to the west of the ROW near the northern end of the alignment appear to have been replaced with industrial / commercial buildings. Additional development was noted in the central region to the east of the ROW that appeared to be for commercial / industrial uses. A helicopter landing pad and an apparent repair shop (confirmed during the Site visit) was located in the southeast quadrant of the Phase I Study Area.
2005	The remaining portion of Highway 50 within the Site was widened to 4 lanes (central portion to southern portion at Mayfield Road). The southern portion of the alignment was re-routed with an additional intersection constructed at Mayfield Road.	A recently constructed car dealership was located near the southern limit of the Site to the east of the ROW. Additional commercial / industrial buildings were observed in the central portion of the Phase I Study Area to the east and west of the ROW.
2015	No significant changes observed since 2005	The remaining farmland and undeveloped land appeared to be developed, primarily with commercial and industrial properties adjoining the Highway 50 ROW. Gas stations and auto repair shops were apparent, as well as vehicle and truck storage lots (commercial trucks and car dealerships).
2018	No significant changes observed since 2005	No significant changes observed since 2015.

4.5 Municipal Land Use Plans

A review of the Region of Peel Official Generalized Land Uses Map from 2014 identified the southern portion of site (Mayfield Road) as the municipal boundary between the Town of Caledon to the north (the Site) and the City of Brampton to the south. Albion Vaughan Road was identified as the regional boundary between York Region to the east and Peel Region to the west. On this basis, the southeast portion of the Phase I Study Area exists within York Region which can be observed on Drawing 28262-2.

The Region of Peel 2014 Plan highlights the Site and Phase I Study Area as Commercial/Industrial Land Use, with residential land use to the northeast of the Phase I Study Area. The CP Rail line was identified on the Plan at the northern limit of the Phase I Study Area.

A review of the Town of Caledon Official Plan Schedule C Bolton Land Use Plan (2018) identified the Site and surrounding Phase I Study Area as a mix of primarily industrial and commercial land uses, with occasional residential and other land uses.

The Town of Caledon 2018 Plan identified the primary land use as industrial to the west of the Site within the Phase I Study Area. The Plan identified the majority of the industrial land as prestige industrial, and to a lesser extent, as general industrial. An area to the west of the Site and south of Healey Road was unidentified on the Plan, however, the Site Reconnaissance indicated that the area appeared to be commercial land use which included a Home Depot and other commercial shopping centres. The unidentified area to the south of McEwan Drive West was identified as several automotive dealership and maintenance facilities during the Site Reconnaissance.

A second unidentified area was located adjacent to the east of Highway 50 between approximately the CP Rail boundary near the northern portion of the Phase I Study Area and McEwan Drive to the south. This area was observed to consist of mixed industrial and commercial land use during the Site Reconnaissance which included Monterra Lumber, Home Hardware and several commercial shopping buildings. A central portion within this area was noted to be vacant land during the Site Reconnaissance.

Properties included in a narrow strip of land adjacent to the Site were identified in the Town of Caledon Plan as the Bolton Highway 50 Commercial Area which extends between Agrocrop Road and Hopcroft Road on the west of Highway 50, and between Parr Road and McEwan Drive East on the east side of Highway 50. Special Residential was designated on a small parcel of land adjacent to the east of Highway 50, between approximately Parr Road and Albion-Vaughan Road.

A small parcel of rural land use was identified near the southern end of the Site alignment, adjacent to the east of the Site. This area was identified as the location of Bolton Toyota during the Site Reconnaissance.

4.6 Topography, Hydrogeology, Geology

Based on the Atlas of Canada – Toporama:

- The Humber River meanders southeasterly approximately 1.9 km to the northeast of the Site.
- The grade of the road alignment gently rises from the south to the north. The road surface near Mayfield Road is at approximate Elevation 226 m and rises to approximate Elevation 238 m near the midway point of the Site. The surface of the road near Healey Road and the northern limit of the Site is at approximate Elevation 248 m.

A review of the Physiographic Regions of Southern Ontario (Figure 19, L. J. Chapman and D. F. Putnam's 1984 edition of the Physiography of Southern Ontario), Surficial Geology of Southern Ontario (Ontario Geological Survey 2010), and a Bedrock Geology map indicated that the northern portion of the Site is primarily located within the Physiographic Region of the South Slope, and the southern portion of the Site extends into the Peel Plain. Surficial soil deposits beneath the Site primarily consist of clay to silt-textured till that were derived from glaciolacustrine deposits or shale. The underlying bedrock typically consists of shale, limestone, dolostone and siltstone of the Georgian Bay Formation.

A general review of the water well information provided on MECP's Water Well Records database (<https://www.ontario.ca/environment-and-energy/map-well-records>) indicated that water levels historically existed between depths of approximately 21 m to 40 m below grade at wells that were screened between depths of approximately 45 m to 70 m below grade.

5 INTERVIEWS

No persons with detailed knowledge of the current or historical activities at the Site were available to interview by Thurber as part of the Phase I ESA.

6 SITE RECONNAISSANCE

6.1 General

A reconnaissance of the Site and Phase I Study Area was conducted on March 21, 2020 by a Thurber representative, Mr. John Zoldy, EIT. The Site visit was conducted after a general review of the historical records and targeted areas of the Site and the surrounding properties that may contribute to potential sources of contamination.

The Site Reconnaissance was documented with field notes and photographs. Select photographs (Photos 1 to 38) are included in Appendix D.

6.2 Limitations / Site Conditions

The Site Reconnaissance was conducted through observations of the Site and of surrounding properties from publicly accessible sidewalks and roadways. At the time of Site visit, the weather was generally clear and the ground surfaces in landscaped and paved areas were generally dry, with occasional damp areas.

Observation of underlying soil conditions were prevented on the Site and in the Phase I Study Area covered by asphalt, vegetation and buildings.

6.3 Interior Observations

No aboveground building structures existed on the Site alignment at the time of the Site Reconnaissance. Above ground structures exist within the Phase I Study Area, however access to these buildings was not provided to Thurber as an assessment of the interior of the “off-site” structures was beyond the scope of the Phase I ESA.

6.4 Exterior Observations

At the time of Site Reconnaissance, Highway 50 was observed to be a four-lane roadway that was paved with asphalt within the travelled portion of the ROW. Gravel shoulders and vegetated roadside ditches and swales generally existed on both the east and west sides of the road within the ROW. Surrounding properties within the Phase I Study Area were observed to be a mix of commercial and industrial land uses, as well as residential, institutional and farmland property uses.

Properties adjacent to the Site were primarily observed to consist of commercial and industrial uses with multiple gas stations, autobody shops / car dealerships, manufacturing operations, commercial trucking terminals, retail stores and restaurants. To a lesser extent, some institutional and community properties including churches, schools and education centers were observed, as well as parkland, and some residential and agricultural properties near the east limits of the Phase I Study Area.

Stormwater ponds with associated multi-use paths also existed with the Phase I Study Area, as well as a CP Rail corridor (industrial uses) that was observed to the north of the Site near the northern portion of the Phase I Study Area. The rail corridor was oriented in an east-west direction and extended beneath a bridge/overpass structure for Highway 50. High volumes of rail traffic were observed at the time of Site Reconnaissance.

6.4.1 Observations of Surrounding Properties

At the time of Site Reconnaissance, the Site and Phase I Study Area generally consisted of commercial, industrial land uses with occasional residential and institutional land uses.

Institutional properties were observed at the following locations:

- 12495 Highway 50 – Connect Church
- 1 Loring Drive – Countryside Montessori & Private School
- 3 Loring Drive – Kingdom Hall of Jehovah’s Witnesses

Various educational and learning centers were also identified within commercial units located along Highway 50, Parr Avenue and McEwan Drive.

The following commercial and industrial land uses which may be considered as potential sources of contamination within the Phase I Study Area included:

- 12833 Highway 50 - Monterra Lumber Mills Ltd. And United Lumber Home Hardware (Photo 12 and 13); stockpiled treated wood, and fuel / propane storage tanks.
- 12760 Highway 50 - The Home Depot (Photo 11); machinery and stockpiled materials.
- 12621 Highway 50 – Speedy Glass (Photo 18) and other associated automotive repair shops and car dealerships.
- 12585 Highway 50 – NAPA AUTOPRO; automotive repair shop.
- 12553 Highway 50 – Vince’s Auto Body; automotive repair shop.

- 12543 Highway 50 – Midas; automotive repair shop (shown in Photo 24).
- 12525 Highway 50 – The Auto Show (Photo 24); automotive repair shop and parking / storage of a large number of vehicles.
- 12500 Highway 50 – Pickard Lane Leasing – Car dealership and service of used cars.
- 12476 Highway 50 – Esso Gas Station (Photo 25).
- 12473 Highway 50 – Cella Auto; automotive repair shop.
- 12435 Highway 50 – Caledon Chrysler Dodge Jeep Ram; car sales and automotive repair.
- 12420 Highway 50 – Bolton Cadillac, Chevrolet, GMC; car sales and automotive repair.
- 12393 Highway 50 – Enterprise Rent-A-Car (Photo 33); vehicle storage and repairs, building and property were previously used as a gas station and automotive repair shop.
- 12343 Highway 50 – Top Lift Enterprises; heavy machinery sales, repair and storage.
- 12275 Highway 50 – Cruise Canada RV Rentals & Sales; sales storage and repair of RVs.
- 12249 Highway 50 – Duro-Shed and U-Haul; metal fabrication and storage and repair of cars, trucks and trailers.
- 12182 Highway 50 -Shell Gas Station (Photo 34 and 35).
- 11221 Highway 50 – Car-Pool parking lot and bus station.
- 15 Healey Road – Active Green + Ross Tire and Automotive Centre (Photo 3).
- 55 Healey Road – Commercial building with multiple tenants including an electric motor shop, electrical supply store and car detailing and spraying shop.
- 60 Healey Road – Commercial building with multiple tenants including a valve manufacturing company, vehicle restoration shop, and Krown rust-proof vehicle spraying.
- 64 Healey Road – Commercial building with multiple tenants including TransCanada Pipelines, Maratek Environmental and Recycling, RJS Metal Precision. Large loading doors were noted at each unit (Photo 10).
- 68 Healey Road - Commercial building with multiple tenants including Big Bark Graphics and Printing. Large loading doors were noted at each unit.
- 71 Healey Road – Danmar Construction was observed. Multiple large pieces of construction machinery were stored in the rear lot of the property.
- 73 Healey Road - Green Valley Woodworking Ltd. Shop observed.
- 77 Healey Road – Big M Steel metal fabrication shop observed.
- 750 Hardwick Road – Cooper equipment rental was observed. Multiple large pieces of construction equipment and fuel storage containers were observed. (Photo 7).

- 760 Hardwick Road – Viper Precision machine shop was observed (Photo 6).
- 770 Hardwick Road – Bolton Tire Sales (Photo 4). Automotive tire and repair shop.
- 780 Hardwick Road – a commercial / industrial building was observed with large loading doors (Photo 5). Historically used as a metal fabrication shop.
- 10 McEwan Drive – National Iron Works was observed at the rear of the building, with large loading / garage doors. Possible metals and molds fabrications (Photo 15).
- 14 McEwan Drive – Fastenal and the National Marine Manufacturers Association of Canada were observed at the rear of the building (Photo 16). Possible marine service and manufacturing.
- 59 McEwan Drive – Canadian Tire Gas Station, fuel storage tanks and a large propane re-filling tank were observed (Photo 17).
- 99 McEwan Drive – Canadian Tire store and associated vehicle service garage were noted (Photo 19).
- 5 Loring Drive - Technical Mold Services Inc. was listed as a manufacturer of molds.
- 50 Commercial Road – Armstrong Propane was observed to have multiple above ground storage tanks for fuels and propane gas. Multiple fuel tanker trucks were observed (Photo 21).
- 2 Industrial Road – Used car dealership and apparent car repair shops were observed.
- 4 Industrial Road – EVOLVE apparel was observed which may include printing, paints and dyes.
- 55 Industrial Road – Tru-Spark tooling and Heading sales were observed. The property appears to be used as a metal fabricating shop.
- 109 Industrial Road – Region of Peel Hazardous Waste Facility and Recycling Center (Photo 22).
- 8850 George Bolton Parkway – Rafat General Contracting (Photo 28).
- 8865 George Bolton Parkway – Princess Auto and Master Mechanics Automotive repair shop (Photo 26).
- 8885 George Bolton Parkway – CarQuest Auto Parts.
- 8895 George Bolton Parkway – Oil Changers (Photo 27) automotive repair and lubrication shop.
- 10 Simona Drive – Ford Dealership with associated repair shop.
- 30 Simona Drive – Fleetex Transport, commercial trucking facility and warehouse.

- 65 Pillsworth Road – Honda dealership and associated automotive repair centre (Photo 32).
- 69 Pillsworth Road – Hyundai dealership and associated automotive repair centre (Photo 32).
- 70 Pillsworth Road – Pactiv trucking terminal and warehouse (Photo 29).
- 71 Pillsworth Road – Nissan dealership and associated automotive repair centre (Photo 32).
- 86 Pillsworth Road - A large commercial warehouse and trucking terminal was observed. A large pad-mounted transformer and possible generator were observed (Photo 30) to the south of the building in the central portion of the yard.
- 99 Pillsworth Road – an apparent warehouse and commercial trucking facility were observed.
- 100 Agrocrop Road – Agrocrop Exports was observed. Facility appeared to be a warehouse with associated commercial trucking activities.
- 11339 Albion Vaughan Road – trucking terminals, truck repair centres, bulk container rentals, above ground storage tanks and helicopter garage, maintenance and fuel were observed (Photo 36 and 37).
- 12050 Albion Vaughan Road – Toyota dealership and associated automotive repair centre (Photo 38).
- 12080 Albion Vaughan Road - Kia dealership and associated automotive repair centre (Photo 38).

6.4.2 Topographic, Geologic, and Hydrogeologic Conditions

The grade of the road alignment gently rises from approximate Elevation 226 m near Mayfield Road and the southern portion of the Site to approximate Elevation 248 m near Healey Road and the northern limit of the Site. To the west of Highway 50 near the southern portion of the Site, the ground surface rises approximately 3 m from approximately Elevation 228 m to Elevation 231 m indicating a possible cut or fill placement.

The stratigraphy within the Site is anticipated to include finer textured silt and clay till deposits that would generally be representative of the South Slope and Peel Plain Physiographic Regions, as indicated in Section 4.7.

The underlying bedrock typically consists of shale, limestone, dolostone and siltstone of the Georgian Bay Formation.

In general, surface water is anticipated to follow the topographic contours and flow southerly, or infiltrate into the ground. Regionally, the groundwater flow direction is also anticipated to be southerly following the general slope of the regional topography.

6.4.3 Utilities and Sewage Works

Generally, overhead utility lines were observed that included hydro lines, telecommunication lines and streetlights / light standards. Evidence of buried utilities was also observed in the form of pad transformers, manholes, hand wells and valve chambers. Possible underground utilities in the Phase I Study Area include hydro, telecommunications, watermains, sanitary sewers, storm sewers, and natural gas.

Hydro poles with random pole-mounted transformers (Photo's 1, 2, 4 and 25) generally existed along the west side of the Site alignment with occasional lateral overhead crossings.

Sanitary sewer manholes were observed at various locations along the Site alignment and Phase I Study Area, indicating that sanitary sewers likely connect and service the commercial and industrial properties within the Phase I Study Area and the residential subdivision between Highway 50 and Albion Vaughan Road. The rural residential houses that exist in the southern portion of the Site are likely serviced by private septic systems (and private water wells).

Fire hydrants were observed at various locations within the Phase I Study Area. The presence of the fire hydrants indicates that the area is likely serviced by municipal water supply.

Stormwater culverts were observed along the east and west ditch lines of the Site where intersecting roads and/or private driveways crossed the ROW to connect to Highway 50, and along the roads throughout the commercial and industrial areas which convey surface water (Photo 23 and 31). At the time of the Site visit, water was visible within the majority of the drainage ditches and swales along the Site alignment. A culvert also crossed beneath Highway 50 from the northwest corner of the George Bolton Parkway intersection to the south east.

6.4.4 Wells

Various monitoring wells with protective casings were observed on properties and roadways within the Phase I Study Area. The monitoring wells were generally located on private properties or were considered privately owned and therefore were not assessed.

A review of the MECP's Water Well Records database (<https://www.ontario.ca/environment-and-energy/map-well-records>) identified multiple wells within the Phase I Study Area, generally for monitoring / observation use and domestic water supply.

No drinking water wells were observed on the Site or on surrounding properties during the Site Reconnaissance, however the EcoLog ERIS report identified 93 wells within the Phase I Study Area. Thirty-three of the 93 listed wells were reported as being used for water supply for domestic, commercial or industrial uses.

6.4.5 Stained Materials

Pavement stains that are typical of roadways were noted on the asphalt along the road, particularly near the intersections. Otherwise, significant staining was not observed on the Site alignment, or on exposed portions of adjoining properties along the Site alignment and within the Phase I Study Area.

No staining or evidence of spills were observed near the railway line that crossed the Phase I Study Area in an east-west direction to the north of the Site. However, the ground surface in the adjacent ditches near the crossing was covered by grass and other vegetation which limited an assessment of the ground conditions.

6.4.6 Stressed Vegetation

The health of the surrounding vegetation could not be ascertained at the time of the Site visit due to the dormant winter weather conditions.

6.4.7 Fill

As indicated in Section 4.1, the preliminary findings of a concurrent geotechnical investigation identified fill materials beneath the asphalt pavement structure along the Site alignment. In addition, fill materials likely exist within the rail corridor near the northern portion of the Site.

Otherwise, fill materials were not evident or observed on adjacent lands during the Site visit, except for off-site locations on undeveloped properties where apparent illegal dumping or stockpiling of construction debris has occurred. In addition, fill may have possibly been placed on an adjacent property near the southern portion of the Site and to the west of Highway 50 where the ground surface rises approximately 3 m.

6.4.8 Watercourses, Ditches, or Standing Water

Roadside ditches and/or swales generally existed along both sides of the Site alignment. The ditches were covered with grass, vegetation and shrubs, however, gabion stones lined portions of the east ditch at culvert or head wall inlets and outlets.

Two stormwater management ponds were observed within the Phase I Study Area during the Site Reconnaissance. One stormwater management pond was observed in the southern portion of Study Area, to the north of 86 Pillsworth Road. The second pond was located to the east and adjacent to the Site near the intersection of George Bolton Parkway and Highway 50 that appeared to receive stormwater runoff from ditches aligning Highway 50.

6.4.9 Roads, Parking Facilities, and Rights of Way

Highway 50 consisted of an asphalt paved four-lane road with gravel shoulders and associated grass or vegetated ditches. No parking facilities existed along the Site alignment, however parking existed for the adjacent commercial, industrial, residential and institutional properties.

A ROW for a CP Rail line existed approximately 400 m to the north of the Healey Road and Highway 50 intersection.

A public parking facility was located to the south of the Site, which is used for car pooling as well as a facility to access public transportation. Several large, private vehicle parking lots were observed within the Phase I Study Area, including lots owned by car dealerships, rental facilities, and institutions.

6.5 Hazardous Materials / Waste Disposal

Maratek Environmental was listed as a waste disposal site at 60 Healey Road and 64 Healey Road. During the Site Reconnaissance waste transfer trucks were observed at the locations (Photo 10).

The Region of Peel operates a hazardous waste and recycling facility at 109 Industrial Road (Photo 22). Several large waste disposal bins, drums and containers were observed at the property.

6.6 Aboveground and Underground Storage Tanks

Aboveground storage tanks were observed at the following locations within the Phase I Study Area:

- 12833 Highway 50 - United Lumber Home Hardware (Photo 12); propane storage and re-filling tanks.
- 59 McEwan Drive – Canadian Tire Gas Station (Photo 17); propane storage and re-filling tanks.
- 8850 George Bolton Parkway – Rafat General Contracting (Photo 28); several fuel storage tanks and mobile truck and trailer fuel storage tanks were observed.
- 11339 Albion Vaughan Road – Total RUBIA lube center and trucking terminal was observed to have a large diesel aboveground storage tank (Photo 36).
- 11339 Albion Vaughan Road – Two above ground storage tanks and a mobile fuel storage truck were observed at National Helicopters (Photo 37).
- 50 Commercial Road – Armstrong Propane was observed to have 10 aboveground fuel storage tanks of unknown volume or content. Various propane and fuel tanks were visible in the yard as well as many fuel transferring trucks (Photo 21).

Underground fuel storage tanks (USTs) would exist at the gas station locations listed below:

- 59 McEwan Drive – Canadian Tire Gas Station
- 12476 Highway 50 – Esso Gas Station
- 12182 Highway 50 – Shell Gas Station

In addition, storage silos were observed at Monterra Lumber Mills (Photo 13) north of the Highway 50 and Healey Road intersection.

6.7 Storage Containers and Unidentified Substances

Two storage containers of unidentified substances were observed at 12182 Highway 50 – Shell Gas Station (Photo 35). Two plastic drums were observed near the locations of the underground storage tanks with an apparent dyed liquid stored. A pump was visible that appeared to remove liquid from an observation well near the fuel storage tanks and discharged directly to a catch basin within the gas station driveway.

6.8 Odours

No unusual odours were noted at the Site or within the Phase I Study Area during the Site Reconnaissance.

6.9 Potable Water Supply

No potable water supply wells were observed on the Site Alignment during the Site Reconnaissance. However, water well information provided in the EcoLog ERIS report identified 93 wells within the Phase I Study Area. Of the 93 wells listed, 33 were reported as being used for water supply for domestic, commercial or industrial uses.

Multiple fire hydrants and apparent water valves for underground water infrastructure were noted during the Site Reconnaissance.

6.10 Special Attention Items

A survey of special attention items, and designated and hazardous substances [i.e. acrylonitrile, arsenic, asbestos, benzene, coke oven emissions, ethylene oxide, isocyanates, lead, mercury, silica, vinyl chloride and polychlorinated biphenyls (PCBs), mould, ozone depleting substances, radon, and urea formaldehyde foam insulation] was not carried out for purposes of this Phase I ESA.

However, silica should be anticipated in concrete structures, asphalt and granular materials, asbestos may be found in some asphaltic concrete pavements, and benzene may be encountered from a release of petroleum hydrocarbons or from contamination from an adjacent property.

Various pole-mounted and green pad-mounted transformers were observed within the Site ROW and on surrounding properties within the Phase I Study Area. Due to the large Site area, each transformer within the Study Area was not assessed and documented. It is unknown if PCB's were contained in the pole or pad-mounted transformers. However, vegetation near the observed transformers appeared healthy and generally no staining was observed on the transformers and poles/pads beneath the transformers.

7 FINDINGS

The Phase I ESA consisted of a desktop review and summary of available historical records obtained through EcoLog ERIS aerial photographs, Google Earth imagery, geologic maps, and

an EcoLog ERIS search which included city directories, and federal, provincial and private environmental databases. The Site Reconnaissance included a visual assessment of the Site and of the Phase I Study Area from publicly accessible locations.

The collected information was used to assess and evaluate past and present uses, conditions and activities at the Site and within the Phase I Study Area to identify potential sources of contamination that may impact the subsurface conditions along the Site alignment and the proposed construction works. Based on an evaluation of the criteria provided in Section 3.0, current and historical activities within the Phase I Study Area that may be contributors to potential sources of contamination at the Site were evaluated. The results are provided in Table D and presented on Drawing 28262-4.

Table D: Summarized Contributors to Potential Sources of Contamination (PSC)

No.	PSC Location	Source of Records	Findings	Contaminants of Potential Concern (COPCs)	Potential Impacted On-Site Location	Rationale for PSC Determination	Relative Potential for Impact
1	Entire Site Alignment	Site Visit Aerial Photos	-Application of de-icing salts -Possible vehicle releases -Unknown quality of possible fill material below roadway	M&I, PHCs, BTEX, VOCs, PAHs	Entire Site	Impacts from migration of salts, vehicle releases on existing roads and unknown environmental quality of fill materials	High
2	11221 Hwy 50	City Directory Site Visit	-Autobody shop	M&I, PHCs, BTEX, VOCs, PAHs	South portion of Site	PSC is proximal to the Site	Low (to the South of the Site)

High

8 CONCLUSIONS

Based on the review and evaluation of information obtained for the Phase I ESA, potential sources of contamination were identified at 75 locations on the Site alignment and within the Phase I Study Area.

The historical and current contributors to potential sources of contamination at the Site generally involved the on-site presence of fill materials, typical vehicle spills within roadways and parking lots and the application of de-icing salts for the purposes of traffic and pedestrian safety.

A total of 74 potential sources of contamination were identified within the surrounding area that may have the potential for migration of contaminants onto the Site. The potential sources included gas stations; car dealerships and service garages; vehicle repair / autobody shops; vehicle storage/parking; car washes; underground and aboveground fuel storage tanks; transformers; printing and paint shops; releases of oils (fuel / hydraulic / motor / transformers / transmission), diesel and gasoline fuels, photography chemicals and possibly coolant and antifreeze; multiple waste generators; lumber suppliers / factory / mills with potential wood preservation; chemical suppliers; testing laboratories; maintenance operations (equipment / vehicles); and the manufacturing of various products (energy wires / cables, measuring, medical and controlling devices, pharmaceuticals and medicine, concrete materials, testing and measuring equipment, machinery, computer equipment, magnetic / optical media, chemical products, stationary products, and transformers).

Forty-one of the potential sources of contamination were evaluated as a high risk for potential impact to the subsurface conditions underlying the Site.

The contaminants of potential concern associated with the potential sources of contamination generally included metals and inorganics, petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene and xylenes (BTEX), polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), polychlorinated biphenyls (PCBs) and organochlorine (OCs) pesticides.

A subsurface investigation involving sampling and analysis of soil and groundwater within the excavation depths for the proposed construction works would be required to confirm or refute the potential for contamination of the subsurface conditions underlying the Site.

STATEMENT OF LIMITATIONS AND CONDITIONS

1. STANDARD OF CARE

This Report has been prepared in accordance with generally accepted engineering or environmental consulting practices in the applicable jurisdiction. No other warranty, expressed or implied, is intended or made.

2. COMPLETE REPORT

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment are a part of the Report, which is of a summary nature and is not intended to stand alone without reference to the instructions given to Thurber by the Client, communications between Thurber and the Client, and any other reports, proposals or documents prepared by Thurber for the Client relative to the specific site described herein, all of which together constitute the Report.

IN ORDER TO PROPERLY UNDERSTAND THE SUGGESTIONS, RECOMMENDATIONS AND OPINIONS EXPRESSED HEREIN, REFERENCE MUST BE MADE TO THE WHOLE OF THE REPORT. THURBER IS NOT RESPONSIBLE FOR USE BY ANY PARTY OF PORTIONS OF THE REPORT WITHOUT REFERENCE TO THE WHOLE REPORT.

3. BASIS OF REPORT

The Report has been prepared for the specific site, development, design objectives and purposes that were described to Thurber by the Client. The applicability and reliability of any of the findings, recommendations, suggestions, or opinions expressed in the Report, subject to the limitations provided herein, are only valid to the extent that the Report expressly addresses proposed development, design objectives and purposes, and then only to the extent that there has been no material alteration to or variation from any of the said descriptions provided to Thurber, unless Thurber is specifically requested by the Client to review and revise the Report in light of such alteration or variation.

4. USE OF THE REPORT

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. NO OTHER PARTY MAY USE OR RELY UPON THE REPORT OR ANY PORTION THEREOF WITHOUT THURBER'S WRITTEN CONSENT AND SUCH USE SHALL BE ON SUCH TERMS AND CONDITIONS AS THURBER MAY EXPRESSLY APPROVE. Ownership in and copyright for the contents of the Report belong to Thurber. Any use which a third party makes of the Report, is the sole responsibility of such third party. Thurber accepts no responsibility whatsoever for damages suffered by any third party resulting from use of the Report without Thurber's express written permission.

5. INTERPRETATION OF THE REPORT

- a) Nature and Exactness of Soil and Contaminant Description: Classification and identification of soils, rocks, geological units, contaminant materials and quantities have been based on investigations performed in accordance with the standards set out in Paragraph 1. Classification and identification of these factors are judgmental in nature. Comprehensive sampling and testing programs implemented with the appropriate equipment by experienced personnel may fail to locate some conditions. All investigations utilizing the standards of Paragraph 1 will involve an inherent risk that some conditions will not be detected and all documents or records summarizing such investigations will be based on assumptions of what exists between the actual points sampled. Actual conditions may vary significantly between the points investigated and the Client and all other persons making use of such documents or records with our express written consent should be aware of this risk and the Report is delivered subject to the express condition that such risk is accepted by the Client and such other persons. Some conditions are subject to change over time and those making use of the Report should be aware of this possibility and understand that the Report only presents the conditions at the sampled points at the time of sampling. If special concerns exist, or the Client has special considerations or requirements, the Client should disclose them so that additional or special investigations may be undertaken which would not otherwise be within the scope of investigations made for the purposes of the Report.
- b) Reliance on Provided Information: The evaluation and conclusions contained in the Report have been prepared on the basis of conditions in evidence at the time of site inspections and on the basis of information provided to Thurber. Thurber has relied in good faith upon representations, information and instructions provided by the Client and others concerning the site. Accordingly, Thurber does not accept responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of misstatements, omissions, misrepresentations, or fraudulent acts of the Client or other persons providing information relied on by Thurber. Thurber is entitled to rely on such representations, information and instructions and is not required to carry out investigations to determine the truth or accuracy of such representations, information and instructions.
- c) Design Services: The Report may form part of design and construction documents for information purposes even though it may have been issued prior to final design being completed. Thurber should be retained to review final design, project plans and related documents prior to construction to confirm that they are consistent with the intent of the Report. Any differences that may exist between the Report's recommendations and the final design detailed in the contract documents should be reported to Thurber immediately so that Thurber can address potential conflicts.
- d) Construction Services: During construction Thurber should be retained to provide field reviews. Field reviews consist of performing sufficient and timely observations of encountered conditions in order to confirm and document that the site conditions do not materially differ from those interpreted conditions considered in the preparation of the report. Adequate field reviews are necessary for Thurber to provide letters of assurance, in accordance with the requirements of many regulatory authorities.

6. RELEASE OF POLLUTANTS OR HAZARDOUS SUBSTANCES

Geotechnical engineering and environmental consulting projects often have the potential to encounter pollutants or hazardous substances and the potential to cause the escape, release or dispersal of those substances. Thurber shall have no liability to the Client under any circumstances, for the escape, release or dispersal of pollutants or hazardous substances, unless such pollutants or hazardous substances have been specifically and accurately identified to Thurber by the Client prior to the commencement of Thurber's professional services.

7. INDEPENDENT JUDGEMENTS OF CLIENT

The information, interpretations and conclusions in the Report are based on Thurber's interpretation of conditions revealed through limited investigation conducted within a defined scope of services. Thurber does not accept responsibility for independent conclusions, interpretations, interpolations and/or decisions of the Client, or others who may come into possession of the Report, or any part thereof, which may be based on information contained in the Report. This restriction of liability includes but is not limited to decisions made to develop, purchase or sell land.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

 Fuel Type Involved: Natural Gas
 Status Desc: Completed - Causal Analysis(End)
 Job Type Desc: Incident/Near-Miss Occurrence (FS)
 Oper. Type Involved: Construction Site (pipeline strike)
 Service Interruptions: Yes
 Property Damage: No
 Fuel Life Cycle Stage: Transmission, Distribution and Transportation
 Root Cause: Root Cause: Equipment/Material/Component:No Procedures:No Maintenance:No Design:No Training:No
 Management:No Human Factors:Yes
 Reported Details:
 Fuel Category: Gaseous Fuel
 Occurrence Type: Incident

Description:

A Caledon company was fined \$5,000 for being a carrier in possession of waste without a manifest. 'Polluters should be aware that the ministry's Investigations and Enforcement Branch will vigorously pursue charges when our environmental laws are broken,' Environment Minister Jim Bradley. Maratek Environmental Inc. operates a waste processing facility in the Town of Caledon. The company operates under ministry approval to collect wastes for bulking and shipping to disposal sites. A ministry inspection revealed that the company was picking up and transporting waste without a prepared manifest from the generator. Maratek Environmental Inc. was fined \$5,000 plus a victim fine surcharge of \$1,250 and was given one year to pay the fine.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jul 31, 2019

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Chemical Register:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jul 31, 2019

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Nov 2019

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2019

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Dec 31, 2019

Drill Hole Database:

Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Environmental Activity and Sector Registry:

Provincial **EASR**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Jan 31, 2020

Environmental Registry:

Provincial **EBR**

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Dec 31, 2019

Environmental Compliance Approval:

Provincial **ECA**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Jan 31, 2020

Environmental Effects Monitoring:

Federal **EEM**

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private **EHS**

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Oct 31, 2019

Environmental Issues Inventory System:

Federal **EIIS**

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2018

List of Expired Fuels Safety Facilities:

Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Federal Convictions:

Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-Nov 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal FED TANKS

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fisheries & Oceans Fuel Tanks:

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2018

Fuel Storage Tank:

Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic:

Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2019

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2019

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2019

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2019

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2019

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Dec 31, 2019

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Jan 2020

Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Dec 31, 2019

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental clean-up orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Nov 2019

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jul 31, 2019

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2019

Wastewater Discharger Registration Database:

Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Jan 31, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Feb 28, 2019

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX D – Site Photographs

Photo 1: Highway 50 facing north at Healey Road intersection. The road raises several meters for a bridge structure over a CP Rail line below. Grass / vegetated ditches are visible on both sides of the road.

Photo 2: Highway 50 facing south at Healey Road intersection. Overhead hydro wires and associated transformers are visible. Commercial buildings exist at the south west quadrant of the intersection.

Photo 3: Active Green + Ross auto service garage located at 15 Healey Road.

Photo 4: Bolton Tire Sales Inc auto service garage located at 770 Hardwick Road. Pole mounted hydro transformers are visible in the photo.

Photo 5: 780 Hardwick Road, historically used as a metal fabrication and manufacturing building and housed a wholesaler / distributor of industrial machinery and chemicals.

Photo 6: Viper Precision located at 760 Hardwick Road. The company was listed as a machine shop and a waste generator of oil skimmings and sludges.

Photo 7: Cooper rental located at 750 Hardwick Road. Machinery, generators, compressors and fuel receptor storage cabinets were observed outside of the building.

Photo 8: Lithoweb located at 730 Hardwick Road is a printing shop with trucking terminals located at the rear of the building.

Photo 9: CP Owned Rail lines crossing beneath Highway 50, located at the northern portion of the Phase I Study Area.

Photo 10: Maratek was located at 64 Healey Road. Maratek was listed as a waste disposal site, and waste generator. Waste disposal trucks are visible loading into the building.

Photo 11: The Home Depot was located at 12760 Highway 50. Machinery, trucks, stockpiles of treated wood and cementitious stone were visible at the property. The Home Depot was listed as a waste generator and was listed as having a back-up diesel generator at the location. The diesel generator was not observed during the site visit.

Photo 12: Home Hardware was located at 12833 Highway 50 at the north limit of the Site. A large propane storage tank was visible at the south west corner of the building, along with the storage of other unknown gas cylinders. Large stockpiles of treated lumber were visible at the rear of the store which neighbors the CP Rail corridor.

Photo 13: Monterra Lumber Mills Limited was located at 12833 Highway 50 at the north limit of the Site. Large stockpiles of treated lumber were visible to the north and east of the building. Wood product manufacturing was evident.

Photo 14: A commercial building located at 12788 Highway 50. Multiple commercial and retail strip malls were located along properties adjacent to the Site. Typically, the buildings appeared to be restaurants, banks, or retail stores. Large piles of snow and sand were visible in most commercial building parking lots indicating that snow removal and salting operations likely occurred through the winter season.

Photo 15: National Iron Works was located at 10 McEwan Drive. The property has been historically used as an automotive shop, manufacturing space for electronic components, metal fabrication, spraying of paints and coatings for automotive applications and has housed several waste generators.

Photo 16: Fastenal and the National Marine Manufacturers Association of Canada were located at 14 McEwan Drive along with several other commercial and industrial companies. Fastenal lists abrasives, metalworking and chemicals, lubricants and coolants at the facility.

Photo 17: A Canadian Tire Gas Station was located at 59 McEwan Drive. Several fuel storage tanks were reported at this location. A large propane storage and re-fill tank was observed in the south west quadrant of the property. A car wash also operated at the location.

Photo 18: Several autobody and automotive garages were observed at 12621 Highway 50, located south of the Canadian Tire Gas Station. Companies observed to be operating at this location include Speedy Glass, Bargain Tire and Auto, German Fine Cars, Batteries Experts and Fine Detailers.

Photo 19: A Canadian Tire store with associated automotive garage was observed at 99 McEwan Drive. A large green pad transformer was observed in the south west quadrant of the property. A fenced enclosure was observed to the west of the automotive center with visible 205 L drums and oil containers being stored.

Photo 20: CSV Holding Corp. was observed at 68 Commercial Road. Propane and fuel storage tanks were observed within the yard as well as multiple waste disposal bins with construction wastes. Several large pieces of construction machinery were observed on the property as well as many commercial trucks. A servicing garage is also shown in the photo.

Photo 21: Armstrong Propane Limited was observed at 50 Commercial Road. This location appears to be at or past the limits of the Study Area and was not noted on the City Directory or Database Search. Multiple above ground fuel storage tanks were observed along with multiple commercial tanker trucks.

Photo 22: Bolton Community Recycling Centre was located at 109 Industrial Road. This facility included a hazardous waste depot and large waste receptacles for garbage and recycling. Evolve Lifestyle was also observed to be located at the facility, which produces printing and screening for clothing marketing materials.

Photo 23: A drainage ditch located at the intersection of Industrial Road and Highway 50 at the north east corner of the intersection. The drainage ditch meanders from properties to the north east past the highly industrial areas (Armstrong fuels and hazardous waste depot) towards the Site. A spill was also reported at this location which impacted the drainage ditch.

Photo 24: A car dealership and automotive garage located at 12525 Highway 50. The neighboring property to the north 12543 Highway contains an autobody repair shop and vehicle fluid change shop. Both properties are located adjacent to the Site.

Photo 25: An Esso gas station is located at 12476 Highway 50 at the north west corner of the Highway 50 and George Bolton Parkway intersection.

Photo 26: Princess Auto was located at 8865 George Bolton Parkway. Princess auto was listed as a waste generator of multiple parameters. Master Mechanics was located in the adjoining building to the south with multiple garage doors and vehicle lifts for automotive repairs.

Photo 27: An Oil Changers automotive garage was located at 8895 George Bolton Parkway. The business is located adjacent to the Site.

Photo 28: Rafat General Contracting was located at 8850 George Bolton Parkway. Commercial trucks and machinery were stored along the perimeter of the building to the north, east and west. Several fuel transportation trucks were noted as well as fuel storage trailers.

Photo 29: Pactiv Canada Inc. was located at 70 Pillsworth Road. The building appeared to be a commercial trucking terminal and warehouse.

Photo 30: A large commercial warehouse and trucking terminal was observed at 86 Pillsworth Road. At the south of the building in the central region a large pad transformer and possible generator were observed.

Photo 31: A corrugated steel culvert was observed at the entrance to 12275 Highway 50, where an RV sales and servicing center was located. The drainage ditch shown flows to the south on the east side of Highway 50.

Photo 32: Highway 50 at Parr Boulevard facing to the north. Several car dealerships and service centers are visible and located on the west side of Highway 50 adjacent to the Site.

Photo 33: Enterprise Rent-a-Car was located at 12393 Highway 50. The property was historically used as a gas station and auto repair garage.

Photo 34: A Shell Gas Station was located at 12182 Highway 50. Several fuel storage tanks were reported for the property. The gas station is located adjacent to the Site.

Photo 35: While completing reconnaissance at the Shell Gas Station, two drums were noted at the north east corner of the property adjacent to the fuel storage tanks and the Site. The drums appear to be filled with a dyed fuel. It was also noted that a small pump was inserted into an observation well around the fuel storage tanks and was discharging water directly into a neighboring catch basin in the parking lot. The drums, pump and discharge water are visible in the photo.

Photo 36: A commercial trucking yard was located at 11339 Albion Vaughan Road. Diesel storage tanks were observed on the property and advertisements for lubrications and truck servicing were noted. A large number of commercial trucks, trailers and containers were observed on the site.

Photo 37: National Helicopters was located at 11339 Albion Vaughan Road. Two fuel storage tanks were observed on the property as well as fuel transfer trucks. Signs for helicopter servicing and garage doors were noted at the location.

Photo 38: Toyota and Hyundai car dealerships and servicing centers were located at 12050 and 12080 Albion Vaughan Road. Automotive repairs and parking and storage of many vehicles were noted. The properties are adjacent to the southern portion of the Site.
