

NOTICE OF STUDY COMPLETION SANITARY SEWER AND WATERMAIN IMPROVEMENTS, SOUTHEAST MISSISSAUGA

The Study

The Region of Peel has initiated a Schedule 'B' Environmental Assessment (EA) for sanitary sewer and watermain improvements near Mattawa Ave. in the City of Mississauga. This work is needed to improve water and wastewater sewer and watermain conditions. Through the Class EA study, the recommended solution includes rehabilitating the existing sanitary sewer on Dundas St. East and installing a new sanitary sewer on Mattawa Ave. from Dundas St. East to the CP Rail line next to Little Etobicoke Creek. The study also recommended installing a new watermain from Mattawa Ave. south to Caterpillar Rd., passing the CP Rail line and crossing Little Etobicoke Creek. The watermain at the end of Wharton Way will also be looped to improve water flow and quality.

The Process

A Project File Report (PFR) was prepared to document the Class EA planning and decision-making process used in developing the recommended solution. The results of the study will be available for review for 30 days starting October 24, 2019 and ending November 23, 2019. The PFR is available for review at the following locations or on the Region's [website](#).

If concerns cannot be resolved through discussion with the Region, interested persons or parties may request that the Minister of the Environment, Conservation and Parks make an Order for the project to comply with Part II of the Environmental Assessment Act (Part II Order). Part II Order must be submitted using a standard form available on the [Provincial Form Repository website](#). The completed form for Part II Order Request must be received by the Minister and the Director, EA and Permissions Branch at the contact details provided below by 4:30 p.m. on November 23, 2019. A copy of the completed form should also be sent to the Region of Peel project team at the address above. If no requests are received by November 23, 2019, the project may proceed to the design and construction stage as outlined in the Project File Report.
