<input type="checkbox"/> clotting factor pre 1986	
<input type="checkbox"/> child of HIV+ mother	
<input type="checkbox"/> needlestick injury	
<input type="checkbox"/> heterosexual ² partner of HIV+ person	
<input type="checkbox"/> heterosexual ² partner of a person at risk of HIV	
<input type="checkbox"/> none	<input type="checkbox"/> 1 IDU
<input checked="" type="checkbox"/> other (specify).....	<input type="checkbox"/> 2 endemic area
	<input type="checkbox"/> 3 transfused
	<input type="checkbox"/> 4 clotting factor
	<input type="checkbox"/> 5 needlestick injury
	<input type="checkbox"/> 6 bisexual male

Outbreak #
2253-2009-032

4 Reason for HIV testing (check all that apply)

<input checked="" type="checkbox"/> Diagnostic	<input type="checkbox"/> Prenatal	<input type="checkbox"/> Visa/immigration requirement
<input type="checkbox"/> Donor of blood/tissue/semen	<input type="checkbox"/> Follow-up	<input type="checkbox"/> Insurance

5 Symptoms

<input type="checkbox"/> none
<input type="checkbox"/> suspected acute seroconversion (flu-like illness)
date of onset (if known) <i>yyyy / mm / dd</i>
date of exposure (if known) <i>yyyy / mm / dd</i>
<input type="checkbox"/> AIDS
<input type="checkbox"/> other HIV related disease
<input type="checkbox"/> other medical conditions (specify).....

6 Specimen Details

Collection date of specimen	<i>yyyy / mm / dd</i>	
Type of specimen	<input checked="" type="checkbox"/> whole blood	<input type="checkbox"/> serum
	<input type="checkbox"/> ACD/EDTA	<input type="checkbox"/> CSF
Tests requested:	<input checked="" type="checkbox"/> HIV1/HIV2	<input type="checkbox"/> HTLVII/HTLVII
Comments		
Laboratory Use Only		
Specimen priority	<input type="checkbox"/>	
Specimen volume	<input type="checkbox"/>	
TF	<input type="checkbox"/>	

2 Physician/Referring Laboratory

DR. / RM / RN BC	Phys
Provide: Submitter Information	
Physician(s) ordering Test	
Agency/institution	

For tests other than HIV and HTLV, use the PHL test requisition
PLEASE FILL IN THE HIV SEROLOGY REQUISITION COMPLETELY AND ACCURATELY

WHOLE CLOTTED BLOOD PREFERRED
Appropriate HIV Serology will be carried out according to the information provided above. Reactive screen tests will be confirmed with supplemental testing and western blot. Additional testing (p24 antigen) will be carried out when a patient is suspected of being in the window period or under other specific circumstances.

Complete information is essential for epidemiologic analyses regarding HIV in Ontario. Information is protected by the FOIPPA and the method of patient identification is left to your discretion (Code or nominal). Anonymous testing is also available at 34 designated Ontario sites.

The identification on specimen **must** match the identification on this form.
