Attention: Greg Beams, Project Manager

SUBJECT: CONTAMINANT OVERVIEW STUDY, OLD SCHOOL ROAD, ORANGEVILLE-BRAMPTON RAILWAY, BOVAIRD DRIVE WEST, VODDEN STREET EAST/WEST, KENNEDY ROAD NORTH/SOUTH, QUEEN STREET EAST, CALEDON AND BRAMPTON, ONTARIO

EnVision Consultants Ltd. is pleased to present the enclosed Contaminant Overview Study for the above-noted project. The report describes the interpreted environmental conditions based on available information and observations and provides conclusions for your consideration.

This Contaminant Overview Study does not constitute an Assessment of Past Uses in accordance with Ontario Regulation 406/19 or a Phase One Environmental Site Assessment in accordance with Ontario Regulation 153/04.

We thank you for utilizing EnVision for this assignment. If there are any questions regarding the enclosed report, please do not hesitate to contact us.

Yours sincerely,

Dhru Enright
Director – Project Management
denright@envisionconsultants.ca

GLOSSARY

TERM	DEFINITION
ABNs	Acid-base neutral compounds
APEC	area(s) of potential environmental concern as defined in O. Reg. 153/04, "the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through (a) identification of past or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activity"
APU	Assessment of Past Uses
As	arsenic
AST	above ground storage tank
B-HWS	boron (hot water soluble)
BTEX	benzene, toluene, ethylbenzene, xylene
CA	Certificate of Approval
Ca	calcium
CN-	cyanide
COPC	contaminant(s) of potential concern
CPs	chlorophenols
Cr-	chromium
Cr (VI)	hexavalent chromium
CSM	conceptual site model
EASR	Environmental Activity and Sector Registry
EBR	Environmental Registry
EC	electrical conductivity
ECA	Environmental Compliance Approval
ERIS	Environmental Risk Information Services
ESA	environmental site assessment
FIP	fire insurance plan
FOI	freedom of information
ha	hectare(s)
Hg	mercury

TERM	DEFINITION
km	kilometre(s)
L	litre(s)
m	metre(s)
masl	metres above sea level
mbgs	metres below ground surface
Mg	magnesium
Metals	O. Reg. 153/04 regulated metals as per Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the Environmental Protection Act
MNDM	Ministry of Northern Development and Mines
MNRF	Ministry of Natural Resources and Forestry
MECP	Ministry of Environment, Conservation and Parks
NPRI	National Pollutant Release Inventory
N/S	not specified in Table 2, Schedule D, of O. Reg. 153/04
Na+	sodium
OCs	organochlorine pesticides
O. Reg. 153/04	Ontario Regulation 153/04, as amended
O. Reg. 347	Ontario Regulation 347, as amended
O. Reg. 406/19	Ontario Regulation 406/19, as amended
ORPs	other regulated parameter(s) per Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the Environmental Protection Act
PAH	polycyclic aromatic hydrocarbon
PCA	potentially contaminating activity as defined in O. Reg. 153/04, "a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One study area"
PCB	polychlorinated biphenyl
PHC	petroleum hydrocarbon
PIN	property identification number
PTTW	permission to take water
PUP	property underwriter plan
PUR	property underwriter report
QA/QC	quality assurance/quality control

TERM	DEFINITION
QP_{ESA}	Qualified Person for ESAs according to MECP (O. Reg. 153/04)
RA	risk assessment
RSC	Record of Site Condition
Rules Document	Rules for Soil Management and Excess Soil Quality Standards
SAP	Sampling and Analysis Plan
SAR	sodium adsorption ratio
Sb	antimony
SCR	Soil Characterization Report
SCS	Site Condition Standards
Se	selenium
THM	trihalomethane
TSSA	Technical Standards and Safety Authority
UST	underground storage tank
VOC	volatile organic compound
WWIS	water well information system

1. EXECUTIVE SUMMARY

EnVision Consultants Ltd. (EnVision) was retained by Region of Peel (the 'Client') to conduct a Contaminant Overview Study (the 'Study') for the following areas in Brampton, Ontario (the 'Project Area'):

- Kennedy Road North/South from 300 m south of Hartford Trail to 100 m north of Vodden Street East (approximately 5.1 km) ('Kennedy Portion');
- Queen Street East from Rutherford Road to Kennedy Road (approximately 0.9 km) ('Queen Portion');
- Vodden Street East/West from Kennedy Road to the Orangeville-Brampton Railway (OBRY) (approximately 1.9 km) ('Vodden Street East/West Portion');
- Orangeville-Brampton Railway from Vodden Street to Old School Road (approximately 9.5 km) ('OBRY Portion');
- Bovaird Drive West from OBRY to 300 m west of McLaughlin Road (approximately 1 km) ('Bovaird Portion'); and
- Old School Road from OBRY to Hurontario Street (approximately 1.2 km) ('Old School Portion').

It is our understanding that the Study was requested for due-diligence purposes to support the management of excess soil which may be generated during activities associated with construction of a proposed trunk sewer for the portions of the Project Area within the Region's Scope Area 1 (which include the areas summarized above).

The Project Area comprises five (5) municipal roadways and one (1) railway line corridor, as described above, in a mixed residential, commercial and industrial area in the City of Brampton. For simplicity in this report Kennedy Road North and Kennedy Road South are described to be oriented in a north-south direction, and Bovaird Drive West and Queen Street East are described to be oriented in an east-west direction.

The objective of the Study was to develop a preliminary determination of the likelihood that one or more contaminants have affected the Project Area through:

- Identification of Potentially Contaminating Activities (PCAs) within the Project Area and Study Area;
- Evaluation and determination if any portion of the Project Area where soil is proposed for excavation could have been affected by a PCA, resulting in the identification of an area of potential environmental concern (APEC) within the Project Area; and,
- If APECs are identified, determine the Contaminants of Potential Concern (COPCs) associated with each APEC, based on the contributing PCA(s).

Based on the records review, site reconnaissance, and evaluation of information, EnVision presents the following findings:

- The Project Area has been utilized as municipal roadways and a railway. Kennedy Road North/South (from Vodden Street East to Steeles Avenue East), Queen Street East, Vodden Street East/West, Bovaird Drive West and Old School Road were developed as municipal roadways and Orangeville-Brampton Railway was developed as a railway by 1877. The southern portion of Kennedy Street South was developed as a municipal roadway in 1954.
- The Project Area ranges in elevation from approximately 195 to 265 metres above sea level (masl). The regional topography in the vicinity of the Project Area generally slopes to the southeast. Based on the local topography, the inferred general shallow groundwater flow direction of the Study Area is anticipated to be to the southeast towards Lake Ontario. It is noted that the Project Area includes more than one (1) subwatershed. The north portion of the Project Area, just south of Old School Road (approximately half-way to Mayfield Road to the south) includes tributaries which feed into Etobicoke Creek, which generally flows southeast, east of - and approximately parallel to - Hurontario Street and crosses Vodden Street in the southern portion of the Project Area. The Project Area from north Mayfield Road to Vodden Street includes tributaries which feed into the Credit River subwatershed. Based on the size of the Project Area and the presence of numerous creeks and tributaries, the groundwater flow direction can only be confirmed through long-term groundwater monitoring.
- The surficial geology in the vicinity of the Project Area is mainly characterized by clay to silt-textured till (derived from glaciolacustrine deposits or shale). Some areas of the Project Area are classified as modern alluvial deposits. The bedrock in the Study Area is shale, limestone, dolostone, and siltstone of the Queenston Formation. Additional details regarding expected of soil, bedrock, and groundwater conditions in the Project Area are provided in EnVision's report entitled "Desktop Geotechnical Study – Proposed Trunk Sewer on Kennedy Rd. & Orangeville Brampton Railway, Old School Rd., Bovaird Dr., Vodden St. and Queen St. E" which is presented under separate cover.
- Several potable water wells were identified within the agricultural area within the northern portion of the Study Area near the Hurontario Portion of the Project Area.
- Provincially significant wetland, Credit Valley Conservation (CVC) regulated areas and Greenbelt – Urban River Valley areas were identified to be surrounding Etobicoke Creek and its tributaries both adjacent to and intersecting the Project Area.
- The following PCAs identified within the Project Area were determined to be contributing to APECs:
  - Fill materials of unknown environmental quality were anticipated to have been brought to the Project Area during construction and/or maintenance activities associated with the roadways and/or associated utilities (PCA 30). Further, it is anticipated that de-icing compounds are applied seasonally to the roadways within the Project Area for the purpose of vehicular safety (PCA E);
  - A rail line (Orangeville-Brampton Railway) was identified in the northern and central portion of the Project Area from as early as 1877, and the Toronto and Goderich Railway was identified in the southern portion of the Project Area from as early as 1856 (PCA 46); and

- Various spills were identified within the portions of the Project Area (PCA A).

- The following PCAs identified within the Study Area were determined to be contributing to APECs:
  - A total of 23 autobody and/or auto service garages (PCA 10 and 27), 17 properties with tank records (PCA 28), four (4) dry cleaners (PCA 37), one (1) transformer (PCA 55), various spills (PCA A) and various other industrial properties were identified within the Study Area as detailed further within this report.

Based on the information obtained through the Study, it was concluded that the above referenced PCAs resulted in the identification of 30 APECs within the Project Area. Based on the APECs identified, associated COPCs in soil include metals and other regulated parameters (ORPs), petroleum hydrocarbons (PHCs), and benzene, toluene, ethylbenzene, xylenes (collectively referred to as BTEX), volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs), semi-volatile organic compounds (sVOCs), and polychlorinated biphenyl (PCBs). Although not considered to be of significant concern, select sampling for organochlorine pesticides (OCs) (potentially associated with neighboring agricultural lands) is recommended as a conservative measure.

This Study was conducted to provide a general overview of the presence of potentially contaminating activities which could impact the environmental quality of soil or groundwater within the Project Area and to inform future investigations associated with the proposed infrastructure work. The scope of work associated with future investigations will be dependent on the design of the below grade infrastructure (i.e., particularly the depth). Once additional details regarding the design depth and location of the tunnel and shafts have been developed, an appropriate sampling and analysis plan can be completed to evaluate soil and/or bedrock quality for management under Ontario Regulation 406/19 and/or to evaluate groundwater quality for proper management/disposal during construction.

2. INTRODUCTION

EnVision Consultants Ltd. (EnVision) was retained by Region of Peel (the 'Client') to conduct a Contaminant Overview Study (the 'Study') for the following areas in Brampton, Ontario (the 'Project Area'):

- Kennedy Road North/South from 300 m south of Hartford Trail to 100 m north of Vodden Street East (approximately 5.1 km) ('Kennedy Portion');
- Queen Street East from Rutherford Road to Kennedy Road (approximately 0.9 km) ('Queen Portion');
- Vodden Street East/West from Kennedy Road to the Orangeville-Brampton Railway (OBRY) (approximately 1.9 km) ('Vodden Street East/West Portion');
- Orangeville-Brampton Railway from Vodden Street to Old School Road (approximately 9.5 km) ('OBRY Portion');
- Bovaird Drive West from OBRY to 300 m west of McLaughlin Road (approximately 1 km) ('Bovaird Portion'); and
- Old School Road from OBRY to Hurontario Street (approximately 1.2 km) ('Old School Portion').

2.1. PROJECT INFORMATION

The Project Area comprises five (5) municipal roadways and one (1) former railway line, as described above, in a mixed residential, commercial and industrial area in the City of Brampton. For simplicity in this report Kennedy Road North and Kennedy Road South are described to be oriented in a north-south direction, and Bovaird Drive West, Queen Street East, and Vodden Street are described to be oriented in an east-west direction.

It is our understanding that the Study was requested for due-diligence purposes to support the management of excess soil which may be generated during activities associated with a proposed trunk sewer for the portions of the Project Area within the Region's Scope Area 1.

An illustration of the entire Project Area is presented as Figure 1, attached. Project Area Location Plans and Areas of Potential Environmental Concern plans demonstrating these described features are presented as Figure 2A through Figure 2G and Figure 3A through Figure 3F, attached.

Additional information pertaining to the Project Area is provided in *Table 2-1,* below:

Table 2-1: Project Area Information

CRITERION	PROJECT AREA INFORMATION
MUNICIPAL ADDRESS(ES)	The Project Area is comprised of roadways and a railway line corridor, and as such, no municipal addresses area associated with this property.
LEGAL DESCRIPTION	A legal description of the Project Area was not provided at the time of this assessment.

CRITERION	PROJECT AREA INFORMATION
PROPERTY IDENTIFICATION NUMBER(S) (PIN)	PIN(s) and/or a Plan of Survey associated with the Project Area were not provided at the time of this assessment.
PROPERTY OWNER(S)	Inferred ownership of the various road segments of the Project Area is as follows: - Town of Caledon: Old School Road - Town of Brampton: Vodden Street East & West, Queen Street East - Region of Peel: Bovaird Drive West; Kennedy Road North and South The ownership of the former Orangeville-Brampton rail line parcel was not confirmed as part of this assessment.
GEOGRAPHICAL COORDINATES	599581.63 m E 4839046.23 m N
LEGAL INSRUMENTS	It is our understanding that at the time of this assessment, the Project Area is not subject to any legal instruments.
RECORD OF SITE CONDITION (RSC) AND/OR RISK ASSESSMENT (RA)	It is our understanding that at the time of this assessment, no RSCs have been filed for the Project Area, nor is an RSC intended to be filed. Further, an RA has not been conducted, nor is there any intention to conduct an RA at this time.

A plan of survey was not available for the Site.

3. OVERVIEW OF THE NVESTIGATION

3.1. OBJECTIVES

The general objectives of the Study include a preliminary determination of the likelihood that one or more contaminants have affected the Project Area through:

- Identification of PCAs within the Project Area and surrounding Study Area;
- Evaluation and determination if any portion of the Project Area where soil is proposed for excavation could have been affected by a PCA, resulting in the identification of an APEC within the Project Area; and,
- If an APEC is identified, determination of COPCs associated with each APEC based on the contributing PCA(s) to inform a Sampling and Analysis Plan.

3.2. SCOPE

The scope of the Study includes the following components:

- A records review of publicly available information;
- Site reconnaissance;
- A review and evaluation of the information gathered from the records review, and the site reconnaissance, including the preparation of a CSM; and,
- The preparation of a Contaminant Overview Study report.

The following key elements were completed as part of this assessment:

- Establishment of an appropriate search radius (the 'Study Area') to adequately evaluate adjacent and neighbouring properties;
- Request and review of:
  - Historical information (i.e., aerial photographs) to establish current and past land uses of the Project Area and identify PCAs at or affecting the Project Area;
  - Applicable physical setting sources and documents (i.e., maps, provincial/federal archives, etc.);
  - Applicable federal and provincial databases, including information available from the TSSA with regards to any storage tanks in the Project Area and/or on adjacent properties;
- Completion of a site reconnaissance; and,
- Documentation of the findings in tables and figures summarizing information of each PCA and APEC, as applicable.

4. RECORDS REVIEW

The records review was conducted to obtain and review records that relate to the Study Area, including both the current and past uses of the Project Area and the PCAs at or affecting the Project Area, in order to determine if an APEC exists within the Project Area.

4.1. PRELIMINARY RECORDS REVIEW

Preliminary records were reviewed to determine the history of development and land use of the Project Area and properties within the Study Area. The preliminary record sources and results of the review are provided in *Table 4-1*, below:

Table 4-1: Summary of the Preliminary Records Review

CRITERION	RECORDS REVIEW RESULTS
STUDY AREA	The Study Area for this undertaking included properties wholly, or partially, within 100 m of the Project Area boundary. Properties wholly beyond 100 m of the Project Area boundary were not added to the Study Area due to low potential to impact the environmental condition of the Project Area. The limits of the Study Area are presented on Figure 2A through Figure 2F, attached.
FIRST DEVELOPED USE OF THE PROJECT AREA	The first developed use of the Project Area was determined through a review of the 1877 Peel County Atlas and subsequent available aerial photographs from 1954 and 1994. Based on the Peel County Atlas and aerial photographs, a portion of Kennedy Road North/South (from Vodden Street East to Steeles Avenue East), Queen Street East, Vodden Street East/West, Bovaird Drive West and Old School Road were developed as municipal roadways and Orangeville-Brampton Railway was developed as a railway by 1877. The southern portion of Kennedy Street South was developed as a municipal roadway prior to the time of the 1954 aerial photograph.

4.2. GENERAL RECORDS REVIEW

As part of the records review, the QP made all reasonable inquiries to determine the following general information pertaining to the Project Area and properties within the Study Area, including inquiries to obtain reasonably accessible records pertaining to the current use(s) and all past uses of the Project Area. The general information sources and results of the review are provided in subsequent sections below.

4.2.1. Historical Insurance Information

Fire insurance plans were not assessed as part of this investigation.

4.2.2. Previous Reports

Previous reports pertaining to the Project Area were not provided for EnVision to review as part of this assessment.

4.3. ENVIRONMENTAL SOURCE INFORMATION

The QP made all reasonable inquiries to obtain information from publicly availably sources that pertains to the following subsections, as are reasonably accessible and pertain to the Project Area and properties within the Study Area.

A summary of the results of the Environmental Source record review is provided in *Table 4-2*, below.

Table 4-2: Summary of Environmental Source Records Review

CRITERION	
NATIONAL POLLUTANT RELEASE INVENTORY (NPRI)	The NPRI records database was not searched as part of this assessment.
ENVIRONMENTAL COMPLIANCE APPROVAL (ECA), CERTIFICATE OF APPROVAL (CA), PERMITS TO TAKE WATER (PTTW), AND CERTIFICATE OF PROPERTY USE (CPU)	The Access Environment Online Database did not identify MECP ECA, CA, PTTW, or CPU records for the Project Area. A total of 23 properties within the Study Area were identified with records, as summarized below: • Imperial Oil Ltd. at 140 Kennedy Road North was registered with approvals related to storm water management systems in 2008. • Petro-Canada at 121 Kennedy Road North was registered for an approval related to stormwater management in 2003. • Maple Leaf Foods Inc. at 32 Kennedy Road North was registered for approvals related to natural gas fired heaters, water heaters and boilers, in 2000 and 2002. • 134 Kennedy Road South was registered for approvals related to natural gas fired dryers in 2002 and 2005 and a storm drain sewer in 2001. • AT Plastics Inc. at 142 Kennedy Road South was registered for an approval related to natural gas combustion equipment for heating in 2008. • Benson & Hedges Inc. at 174 Kennedy Road South was registered with approvals relating to cooling towers, exhaust systems, wet scrubber, a natural gas fired thermal fume incinerator, a baghouse dust collector, and a natural gas fired boiler in 2000 and 2008. • Imperial Oil Ltd. at 7995 Kennedy Road South was registered with an approval related to stormwater management systems in 2008. • John Logan Chevrolet Oldsmobile at 241 Queen Street East was registered with an approval related to a spray booth, solvent preparation station, undercoating booth and paint mix room in 2004. • Colony Ford Lincoln Sales Inc. at 300 Queen Street East was registered with approvals related to two (2) spray paint booths and one (1) paint mix room exhaust in 2003. • Petro-Canada at 354 Queen Street East was registered with an approval related to sewage works in 2001. • Brampton Brick Limited/Richvale York Block Inc. at 225 Wanless Drive was registered with an approval related to industrial air (dust control system, concrete block plant) in 1988 and baghouse dust collector in 1993.

CRITERION	
	• City of Brampton at 130 Sandalwood Parkway West was registered with an approval related to air systems in 2017. • Hydro One at 175 Sandalwood Parkway West was registered with an approval related to air systems in 2006. • Industrial Thermo Polymers Limited at 153 Van Kirk Drive West was registered with an approval related to industrial air in 1996 and industrial sewage works in 2008 • The Butcher Engineering Enterprises Limited at 105 Van Kirk Drive was registered with an approval related to air in 2006. • Copperweld Canada, Sonco Steel Tube Div at 95 Van Krik Drive was registered with an approval for vent/hoods for welding operations in 1998. • GO a division of Metrolinx at 85 Van Kirk Drive was registered with an approval related to air in 2011. • Call Disposal Services Ltd. at 190 Bovaird Drive West was registered with an approval related to air in 2008 and waste management systems in 2012. • Regional Municipality of Peel (location along Vodden Street East) was registered with an approval related to municipal sewage in 1995. • City of Brampton at 75 Vodden Street East was registered with an approval related to air in 1995. • Imperial Oil Limited at 75 Vodden Street East was registered with an approval related to industrial sewage works in 2008. • Petro Canada at 121 Kennedy Road North was registered with an approval related to industrial sewage works in 2003. • Wallstar properties at 99 Kennedy Road North was registered with an approval related to industrial air in 1985.
INVENTORY OF COAL GASIFICATION PLANTS	The OGS Earth database of the Inventory of Coal Gasification Plants did not identify records of coal gasification plants or coal tar sites associated with the Project Area or properties within the Study Area.
WASTE MANAGEMENT RECORDS, INCLUDING CURRENT AND HISTORICAL WASTE STORAGE LOCATIONS, O. REG. 347 WASTE GENERATOR / RECEIVER SUMMARY RECORDS, AND MECP WASTE DISPOSAL INVENTORY	The ERIS report did not identify Waste Receiver Records for the Project Area or properties within the Study Area. No O. Reg. 347 Waste Generator Summary Records were identified for the Project Area. A total of 974 records were identified for the Study Area. The following addresses were identified with waste generation records which coincide with operations listed in other databases (i.e., Scott's Manufacturing Directory or Dry-Cleaning Facilities). • 105 Vankirk Drive; • 190 Bovaird Drive; • 225 Wanless Drive; • 175 Sandalwood Parkway West; • 190 Bovaird Drive; • 111 Van Kirk Drive; • 110 Canam Crescent; • 85 Van Kirk Drive;

CRITERION	
	• 130 Sandalwood Parkway; • 190 Highway 7 West; • 225 Wanless Drive; • 133 Vankirk Drive; • 195 Sandalwood Parkway West; • 95 Van Kirk Drive; • 153 Vankirk Drive; • 420 Railside Drive; • 190 Canam Crescent; • 10031 McLaughlin Road; • 9950, 10010, and 10021 McLaughlin Road; • 121 Kennedy Road; • 140 Kennedy Road; • 36 Vodden Street; • 32 Kennedy Road South; • 100 Kennedy Road South; • 110 Kennedy Road South; • 114 Kennedy Road South; • 134 Kennedy Road South; • 144 Kennedy Road South; • 158 Kennedy Road; • 174 Kennedy Road; • 365 Kennedy Road South; • 400 Steeles Avenue East; • 1 Wexford Road; • 255 Queen Street; • 174 Queen Street East; • 457 Queen Street East; and • 180 Hurontario Street. Further details of operations related to these addresses are described in Table 1A through Table 1F. Due to the nature of waste products (i.e., pathological and pharmaceutical wastes) identified or small quantity of wastes, the remaining properties identified in these databases were not anticipated to have impacted the environmental quality of the Project Area and are therefore not listed herein. Details pertaining to these additional records can be found in the ERIS report in Appendix A.
RECORDS OF FUEL STORAGE MAINTAINED BY TECHNICAL	The ERIS report did not identify records of fuel storage for the Project Area. A total of 207 records within the Study Area were identified, including the following addresses:

CRITERION	
STANDARDS AND SAFETY AUTHORITY (TSSA)	• A retail fuel storage tank was registered to Northwood Park Service Centre Inc. located at 190 Highway 7 West, east adjacent of the Project Area. • A retail fuel storage tank was registered to Butcher Engineering located at 105 Van kirk Drive, west adjacent of the Project Area. The tank is inferred to be located adjacent to the building approximately 40 m west of the Project Area. • 9950 McLaughlin Road (Husky), south adjacent to the Bovaird Portion of the Project Area, was listed with three (3) gasoline USTs. • 10010 McLaughlin Road (ESSO), north adjacent to the Bovaird Portion of the Project Area, was listed with three (3) gasoline USTs. • 10021 McLaughlin Road (Canadian Tire), north adjacent to the Bovaird Portion of the Project Area, was listed with two (2) gasoline and one (1) diesel USTs. • A gas station, ESSO Maximum, has been located at 140 Kennedy Road North, east adjacent to the Project Area since as early as 1981, and was listed with five (5) gasoline and one (1) diesel USTs. • A gas station, Petro Canada, has been located at 121 Kennedy Road North, west adjacent to the Project Area since as early as 2003, and was listed with three (3) gasoline and one (1) diesel USTs. • 140 Kennedey Road North (ESSO), east adjacent to the Kennedy Portion of the Project Area, was listed with five (5) gasoline and one (1) diesel USTs. • 121 Kennedey Road North (ESSO), west adjacent to the Kennedy Portion of the Project Area, was listed with three (3) gasoline and one (1) diesel USTs. • 10 Kennedey Road South (Parkinson Coach Lines), east adjacent to the Kennedy Portion of the Project Area, was listed with one (1) diesel UST in 1982. • 230 Queen Street East (Shell Canada), west adjacent to the Kennedy Portion of the Project Area, was listed with waste oil and bulk oil tanks. • 18 Kennedey Road South (ESSO), east adjacent to the Kennedy Portion of the Project Area, was listed with two (2) gasoline and two (2) diesel USTs. • 73 Kennedy Road South (Budget Rent-A-Car), west adjacent to the Kennedy Portion of the Project Area, was listed with one (1) gasoline and one (1) diesel UST. • 253 Kennedey Road South (Husky), west adjacent to the Kennedy Portion of the Project Area, was listed with three (3) gasoline and one (1) diesel USTs. • 7995 Kennedey Road South (ESSO), east adjacent to the Kennedy Portion of the Project Area, was listed with three (3) gasoline and one (1) diesel USTs. • One (1) gasoline and one (1) waste oil USTs were listed at John Logan Chevrolet Olds Inc., located at 241 Queen Street East, south adjacent to the Project Area, installed in 1984. • 252 Queen Street East (Canadian Tire), north adjacent to the Queen Portion of the Project Area, was listed with five (5) gasoline USTs and four (4) other tanks. Due to distance from the Project Area, the remaining properties identified in these databases were not anticipated to have impacted the environmental quality of the Project Area and are therefore not listed herein. Details pertaining to these additional records can be found in the ERIS report in Appendix A.

CRITERION	
NOTICES AND INSTRUMENTS, INCLUDING RECORDS OF SITE CONDITION (RSCS) POSTED ON THE SITE REGISTRY	The Site Registry did not identify records of Environmental Registrations for the Project Area, including RSCs. Five (5) RSCs were identified for properties within the Study Area, including: 10254 Hurontario street, located east adjacent to the Hurontario Portion of the Project Area, was registered with RSC # 225036, in September 2018: • A Phase One ESA was conducted for the property which identified nine (9) APECs, associated with PCAs including on-site fill materials, USTs and ASTs, off-site USTs and pesticides application. • A Phase Two ESA was conducted to investigate the identified APECs, and resulted in no found impacts in the soil and groundwater. 75 Van Kirk Drive, located in the west adjacent of the Project Area, was registered with RSC # 114530, in June 2011: • RSC was filed based on the Phase One ESA and Phase Two ESA. The remaining RSCs did not provide salient information which impacted the identification of APECs for the Project Area.
AREAS OF NATURAL SIGNIFICANCE MAINTAINED BY THE MINISTRY OF NATURAL RESOURCES AND FORESTRY (MNRF)	The Natural Heritage Areas database lists areas of natural significance including provincial parks, conservation reserves, areas of natural and scientific interest, wetlands environmentally significant areas, habitats of a threatened or endangered species, and wilderness areas. A review of this database listed the Eastern Meadowlark as a threatened species as well as Eastern Meadowlark, Bobolink, Redside Dace and Butternut as endangered within 1 km of the Project Area. As the Project Area consists of roadways and a non-operational railway line, these species are not anticipated to inhabit within the Site. If required, an environmental specialist could be retained to undertake a site-specific ecological assessment. For the purposes of this study, further assessment is not deemed warranted at this time. The Natural Heritage Areas database also identified the following areas of natural significance in the Study Area, as depicted on Figure 2A through Figure 2A. • Provincially significant wetland, CVC regulated areas and Greenbelt – Urban River Valley areas were identified to be surrounding Etobicoke Creek and its tributaries both adjacent to and intersecting the Project Area.

4.4. PHYSICAL SETTING SOURCES

4.4.1. Aerial Photographs and Satellite Imagery

Aerial photographs from the City of Brampton were reviewed as part of this assessment. The first available aerial photograph from 1954 was reviewed in order to determine early land use. Subsequent aerial photographs were obtained for review, as available (i.e., 1994, 2004, 2014, and 2024) in order to observe changes to the Project Area and Study Area over time. The County Atlas of Peel was utilized to obtain a more historical image from 1877.

Copies of the aerial photographs and Atlas are provided in Appendix B. Significant information depicted in these photographs is summarized in *Table 4-3*, below.

Table 4-3: Summary of Aerial Photograph and Satellite Imagery Review

YEAR	SUMMARY OF SALIENT INFORMATION
1877 PEEL COUNTY ATLAS	The Project Area was developed as municipal roadways (Kennedy Road North/South (from Vodden Street East to Steeles Avenue East), Queen Street East, Vodden Street East/West, Bovaird Drive West and Old School Road. Additionally, Orangeville-Brampton Railway was developed as a railway. A rail line was observed to intersect the central area of the Kennedy Portion of the Project Area in an east-west direction. The properties in the Study Area appeared to be utilized for agricultural and residential purposes. Etobicoke Creek appeared to run parallel and perpendicular and intersected the Project Area at various locations.
1954	The Project Area appeared similar to the 1877 County Atlas with the exception of the southern portion of Kennedy Street South which appeared to be developed as a municipal roadway. Properties within the surrounding Study Area appeared to be primarily used for residential or agricultural purposes.
1994	The Project Area appeared similar to the 1954 aerial photograph. Aerial photographs were not available for the northern portion of the OBRY and Old School Road and the surrounding areas. Properties within the surrounding Study Area appeared to be primarily used for residential or agricultural purposes, with the exception of central portion of the OBRY, eastern portion of Queen Street, and the central portion of Vodden Street which appeared to be used for commercial/industrial purposes. Due to poor image quality, a detailed description of the commercial, industrial, and residential properties is not possible.
2004 - 2024	Generally, the Project Area and Study Area appeared similar to the 1994 aerial photograph, and similar to present-day configuration.

4.4.2. Regional Topography, Physiography, Geology, and Hydrogeology

Mapping resources available from federal, provincial, and territorial agencies were reviewed to assess the physical settings of the Project Area. The findings of the review are summarized in *Table 4-4*, below:

Table 4-4: Summary of the Physical Setting Records Review

CRITERION	PHYSICAL SETTING RECORDS REVIEW RESULTS
TOPOGRAPHY	The Project Area ranges in elevation from approximately 195 to 265 masl. The regional topography in the vicinity of the Project Area generally slopes to the southeast. Based on the local topography, the inferred general shallow groundwater flow direction of the Study Area is anticipated to be to the southeast towards Lake Ontario. It is noted that the Project Area includes more than one (1) subwatershed. The north portion of the Project Area, just south of Old School Road (approximately half-way to Mayfield Road to the south) includes tributaries which feed into Etobicoke Creek, which generally flows southeast, east of - and approximately parallel to - Hurontario Street and crosses Vodden Street in the southern portion of the Project Area. The Project Area from north Mayfield Road to Vodden Street includes tributaries which feed into the Credit River subwatershed. Based on the size of the Project Area and the presence of numerous creeks and tributaries, the groundwater flow direction can only be confirmed through long-term groundwater monitoring. The

CRITERION	PHYSICAL SETTING RECORDS REVIEW RESULTS
	approximate topography and inferred groundwater flow direction within the Study Area is depicted on Figure 2A through Figure 2F.
PHYSIOGRAPHY	The northern portions of the Project Area (Old School, Orangeville Brampton railway, and Bovaird) are situated within drumlinized till plains. The southern portions of the Project Area (Kennedy and Queen and Vodden Portions) are situated within bevelled till plains.
MECP WELL RECORDS, GEOLOGY AND HYDROGEOLOGY	The surficial geology in the vicinity of the Project Area is mainly characterized by clay to silt-textured till (derived from glaciolacustrine deposits or shale). Some areas of the Project Area are classified as modern alluvial deposits. The bedrock in the Study Area is shale, limestone, dolostone, and siltstone of the Queenstone Formation. Additional details regarding expected of soil, bedrock, and groundwater conditions in the Project Area are provided in EnVision's report entitled "*Desktop Geotechnical Study – Proposed Trunk Sewer on Kennedy Rd. & Orangeville Brampton Railway, Old School Rd., Bovaird Dr., Vodden St. and Queen St. E*" which is presented under separate cover. Based on review of the MECP Well Records, several potable water wells were identified within the surrounding areas of Old Schol Road . The current status of these wells is unknown. The approximate well locations based on MECP well records are depicted on Figure 2A through Figure 2F.

4.5. SITE OPERATING RECORDS

To be classified as an enhanced investigation property, the Project Area must be used or have been used in whole or in part for any of the following uses:

- any industrial use;
- as a garage;
- as a bulk liquid dispensing facility, including a gasoline outlet; or,
- or the operation of dry-cleaning equipment.

Portions of the Project Area are comprised of municipal roadways and are not considered an enhanced investigation property. A portion of the Project Area comprises the former Orangeville-Brampton Rail line which is no longer operational. Operating records for the non-operational railway were not reviewed as it is the QP's opinion that such records cannot reasonably be expected to be available for a small closed section of a mainline railway.

5. SITE RECONNAISSANCE

A site reconnaissance of the Project Area was conducted to determine if any PCAs exist within the Project Area which would result in the identification of an APEC and to determine if potential contaminant pathways are present that could result in the presence of contaminants.

A written description documenting the observations and investigation of the Project Area and Study Area is provided in the following subsections.

5.1. GENERAL REQUIREMENTS

A summary of the general requirements of the site reconnaissance is provided in *Table 5-1*, below:

Table 5-1: Summary of General Requirements of the Site Reconnaissance

CRITERION	SUMMARY OF GENERAL DETAILS
DATE AND TIME	July 23, 2025, 12:30 – 16:30
WEATHER CONDITIONS	The temperature was approximately 42°C and weather conditions were clear.
LENGTH OF TIME	4 hours
WHETHER THE FACILITY WAS OPERATING AT THE TIME OF THE INVESTIGATION AS AN ENHANCED INVESTIGATION PROPERTY	At the time of the site reconnaissance, the Project Area was comprised of various municipal roadways and a former railway line. While railways are classified as enhanced investigation properties under O. Reg. 153/04, the line is no longer in operation. Operating records for the non-operational railway were not reviewed as it is the QP's opinion that such records cannot reasonably be expected to be available for a small closed section of a mainline railway. However, the absence of these records review is not considered a limitation to meeting the objectives of this assessment.
THE NAME AND QUALIFICATIONS OF THE INVESTIGATOR	The site reconnaissance was conducted by Ishita Patel. Ishita's qualifications are presented in Section 7.2.
LIMITATIONS	Due to the presence of significant weed overgrowth along some portions for the former rail line, physical inspection of the entire alignment was not feasible.

Select photographs taken during the Site reconnaissance, including a written description and explanation, are provided in Appendix C.

5.2. SPECIFIC OBSERVATIONS WITHIN THE PROJECT AREA

The reconnaissance included a visual inspection of the Project Area. A summary of the specific observations within the Project Area is provided in *Table 5-2*, below:

Table 5-2 Summary of Specific Observations within the Project Area

	CRITERION	SUMMARY OF SPECIFIC OBSERVATIONS
STRUCTURES	STRUCTURES AND OTHER IMPROVEMENTS, INCLUDING NUMBER AND AGE OF BUILDINGS AND BELOW-GROUND STRUCTURES	The Project Area is comprised of municipal roadways and a former railway and therefore does not contain any structures. It is noted that railway tracks remain in place along some portions of the former rail line while in other portions, the tracks have been removed.
	DETAILS OF ALL ASTS AND USTS, INCLUDING MATERIAL, METHOD OF CONSTRUCTION, AGE, CONTENTS, VOLUME, AND DETAILS OF USE	There was no evidence of ASTs or USTs observed within the Project Area during the site reconnaissance, including vent pipes, fill pipes, or soil depressions.
	POTABLE AND NON-POTABLE WATER SOURCES	As the Project Area is comprised of municipal roadways and a railway, it is not specifically serviced for water; however, the municipal roadways are underlain by watermains which supply surrounding neighbourhoods.
UTILITIES	UNDERGROUND UTILITIES AND CORRIDORS	Underground utilities and associated corridors are present at various locations within the roadways that comprise the Project Area. The presence of buried utilities along the railway line was not confirmed.
INTERIOR OF STRUCTURES	EXIT AND ENTRY POINTS	Not applicable, as the Project Area is comprised of municipal roadways and a former railway.
	DETAILS OF EXISTING AND FORMER HEATING AND COOLING SYSTEMS, INCLUDING FUEL SOURCE	Not applicable, as the Project Area is comprised of municipal roadways and a former railway.
	DETAILS OF DRAINS, PITS, AND SUMPS, INCLUDING CURRENT AND FORMER USE AND ANY EVIDENCED OF STAINING OR CORROSION	Not applicable, as the Project Area is comprised of municipal roadways and a former railways.
	DETAILS OF ANY UNIDENTIFIED SUBSTANCES	None identified.

	CRITERION	SUMMARY OF SPECIFIC OBSERVATIONS
MISCELLANEOUS	DETAILS AND LOCATIONS OF WELLS	No monitoring wells were observed during the reconnaissance.
	DETAILS OF SEWAGE WORKS, INCLUDING LOCATION	The portion of the Project Area occupied by municipal roadways contain buried storm and sanitary sewer lines and associated services for properties along the roadways.
	DETAILS OF GROUND SURFACE, INCLUDING TYPE OF COVER	The ground surface within the roadway portions of the Project Area generally comprises paved roadway with landscaped boulevards. The ground surface along the former rail line is generally gravel covered with some areas still containing rail tracks and other where the tracks have been removed. The overall rail line is generally overgrown with weeds.
	DETAILS OF CURRENT OR FORMER RAILWAYS LINES OR SPURS	As noted above, the former Orangeville-Brampton rail line comprises the north portion of the Project Area (south of Old School Road and north of Vodden Street) and additional rail spurs were identified in the central portion of the Project Area.
EXTERIOR OBSERVATIONS	AREAS OF STAINED SOIL, VEGETATION, OR PAVEMENT	No areas of stained soil, pavement, or vegetation were observed. The ground surface was wet due to inclement weather during the site reconnaissance so there is some inherent uncertainty.
	AREAS OF STRESSED VEGETATION	There was no evidence of stressed vegetation observed.
	AREAS WHERE FILL AND DEBRIS MATERIALS HAVE BEEN PLACED OR GRADED	Fill materials were not observed during the site reconnaissance; however, it is anticipated that fill materials were brought to the Project Area during the construction of the roadways, during repairs and/or during the installation of utilities and/or former rail line, as evidenced by the presence of gravel at surface along the railway line.
	POTENTIALLY CONTAMINATING ACTIVITY	The environmental quality of the above-mentioned fill anticipated to have been placed within the Project Area is not known (PCA 30). Further, it is anticipated that de-icing compounds are applied seasonally to the roadway portion of the Project Area for the purpose of vehicular safety (PCA E). The Orangeville-Brampton Railway was present in the north and central portion of the Project Area since 1856 (PCA 46.1).
	DETAILS OF UNIDENTIFIED SUBSTANCES	There were no unidentified substances observed within the Project Area.

5.3. OBSERVATIONS WITHIN THE STUDY AREA

The reconnaissance included a visual inspection of adjacent properties and properties located within the Study Area conducted from the boundary of the Project Area and from publicly accessible areas. A summary of the specific observations within the Study Area is provided in *Table 5-3*, below:

Table 5-3: Summary of Observations within the Study Area

CRITERION	SUMMARY OF OBSERVATIONS
ADJACENT LAND USES	Adjacent land uses relative to the Old School Road portion of the Project Area observed at the time of the site reconnaissance were noted as follows: North: Agricultural/ residential uses, South: Agricultural/ residential uses, East: Hurontario Street followed by agricultural land. West: Historical railway line followed by agricultural land. Adjacent land uses relative to the Orangeville Brampton Railway Portion of the Project Area observed at the time of the site reconnaissance were noted as follows: North: Agricultural/ residential uses, South: Primarily residential with some commercial uses. East: Industrial uses followed by residential uses. West: Residential and industrial uses. Adjacent land uses relative to the Bovaird Drive West Portion of the Project Area observed at the time of the site reconnaissance were noted as follows: North: Mix industrial and Commercial uses. South: Primarily residential uses. East: Primarily residential with some commercial uses. West: Mix industrial and Commercial uses. Adjacent land uses relative to the Kennedy Road Portion of the Project Area observed at the time of the site reconnaissance were noted as follows: North: Primarily residential with some commercial uses. South: A tributary of Etobicoke Creek, followed by commercial and community uses. East: Residential uses in the north and commercial uses in the south. West: Mixed industrial and Commercial uses. Adjacent land uses relative to the Queen Street Portion of the Project Area observed at the time of the site reconnaissance were noted as follows: North: Commercial uses followed by residential subdivisions. South: Primarily commercial uses. East: Commercial and/or industrial uses. West: Residential and commercial uses. A high-level summary of adjacent land uses is depicted on Figure 2A through Figure 2F.
POTENTIALLY CONTAMINATING ACTIVITY	Various commercial autobody shops and auto repair garages were observed north and south adjacent to the Project Area (PCA 10 and PCA 27). Various gasoline service stations were observed north and south adjacent to the Project Area (PCA 28). Various dry cleaners were observed within the Study Area (PCA 37). Agricultural fields were observed in the neighboring lands in the north portion of the Project Area. It is possible that pesticides were being used on these lands (PCA 40.1).

CRITERION	SUMMARY OF OBSERVATIONS
	The locations PCAs identified in the Study Area during the site reconnaissance are depicted on Figure 2A through Figure 2Fand further discussed in Table 1A through Table 1F, attached.
WATER BODIES	It is noted that the Project Area includes more than one (1) subwatershed. The north portion of the Project Area, just south of Old School Road (approximately half-way to Mayfield Road to the south) includes tributaries which feed into Etobicoke Creek, which generally flows southeast, east of - and approximately parallel to - Hurontario Street and crosses Vodden Street in the southern portion of the Project Area. The Project Area from north Mayfield Road to Vodden Street includes tributaries which feed into the Credit River subwatershed. Based on the size of the Project Area and the presence of numerous creeks and tributaries, the groundwater flow direction can only be confirmed through long-term groundwater monitoring.
AREAS OF NATURAL SIGNIFICANCE	Provincially significant wetland, CVC regulated areas and Greenbelt – Urban River Valley areas were identified to be surrounding the Etobicoke Creek and its tributaries both adjacent to and intersecting the Project Area

6. REVIEW AND EVALUATION OF INFORMATION

A review and evaluation of information gathered from the records review and site reconnaissance was conducted, as summarize in *Table 6-1*, below:

Table 6-1: Summary of a Review and Evaluation of Information gathered during the Study

CRITERION	SUMMARY OF REVIEW AND EVALUATION
POTENTIALLY CONTAMINATING ACTIVITY	PCAs identified within the Project Area and/or the Study Area, along with EnVision's assessment of the potential for these activities to impact the environmental quality of the Project Area are summarized in Table 1A through Table 1F, attached. PCAs, including the number and location of any ASTs and USTs (if known), are illustrated on Figure 2A through Figure 2F.
AREAS OF POTENTIAL ENVIRONMENTAL CONCERN	Based on a review of the PCAs summarized in Table 2A through Table 2F, APECs were identified within the Project Area. The resulting APECs are depicted on Figure 3A through Figure 3F.

6.1. CONCEPTUAL SITE MODEL

Through analysis and interpretation of available information gathered during the Study, a CSM was developed for the Project Area, as depicted on Figure 2A through Figure 2F and Figure 3A through Figure 3F, attached, which includes:

- Existing buildings and structures within the Project Area;
- Roads, including names, within the Study Area;
- Uses of properties adjacent to the Project Area;
- Areas where PCAs have occurred, including the location of any tanks;
- Location of APECs;
- Water bodies located in whole, or in part, within the Study Area;
- Areas of natural significance located in whole, or in part, within the Study Area; and,
- Water wells within the Study Area.

7. CLOSING

7.1. CONCLUSIONS

Based on the information obtained through the Study, it was concluded that PCAs within the Project Area and within the Study Area resulted in the identification of 30 APECs within the Project Area, as outlined in detail in Table 2a through Table 2d.

Based on the APECs identified, associated COPCs in soil include metals and ORPs, PHCs, and BTEX, VOCs, PAHs, VOCs, ABNs and PCBs. Although not considered to be of significant concern, select sampling for organochlorine pesticides (OCs) (potentially associated with neighboring agricultural lands) is recommended as a conservative measure.

This Study was conducted to provide a general overview of the presence of potentially contaminating activities which could impact the environmental quality of soil or groundwater within the Project Area and to inform future investigations associated with the proposed infrastructure work. The scope of work associated with future investigations will be dependent on the design of the below grade infrastructure (i.e., particularly the depth). Once additional details regarding the design depth and location of the tunnel and shafts have been developed, an appropriate sampling and analysis plan can be completed to evaluate soil and/or bedrock quality for management under Ontario Regulation 406/19 and/or to evaluate groundwater quality for proper management/disposal during construction.

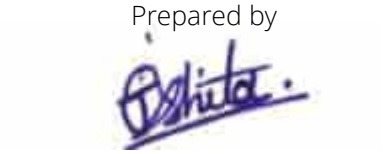
7.2. QUALIFICATIONS OF THE ASSESSORS

Ishita Patel, B.Sc., Project Coordinator

Ishita Patel is Project Coordinator with EnVision, with a strong background in environmental engineering. Ishita has 6 years of experience conducting environmental site assessments, including collecting soil, groundwater, and air samples, analyzing data, and reporting findings. Ishita has supported various projects involving remediation, risk assessment, excess soil management, Record of Site Condition (RSC) filing, and/or the conveyance of lands. She has demonstrated a proven ability to meet project goals while maintaining deadlines under circumstances involving multiple demands and conflicting priorities. Ishita's responsibilities include coordinating and conducting field activities, including borehole layout, supervising utility clearances, borehole drilling, and monitoring well installations, collecting soil and groundwater samples, sample management, and preliminary data analysis and reporting.

Maryanne Caluori, M.A.Sc., GIT, Project Manager – Environment

Maryanne Caluori is a Project Manager with EnVision Consultants Ltd. Maryanne has obtained a Bachelor of Science in Earth Sciences and a Master of Applied Science in Civil Engineering at McMaster University and is a Geoscientist-in-Training (GIT). Maryanne has four years of experience and has been involved in numerous environmental projects including Phase One and Phase Two Environmental Site Assessments (ESAs) in accordance with O. Reg. 153/04, as well as Excess Soil Management in accordance with O. Reg. 406/19. Maryanne has experience coordinating multidisciplinary projects,



maintaining, and tracking project schedules, overseeing, assisting with, and reviewing the execution of field services, as well as technical report writing.

Rodney Obdeyn, P.Eng., QP_{ESA}, Principal Engineer - Environment

Rodney Obdeyn is a Principal Engineer with EnVision Consultants Ltd., licensed in the Province of Ontario. Rodney obtained a Bachelor of Engineering Degree from McMaster University and has been involved with hundreds of Phase One and Phase wo Environmental Site Assessments for both private and public sector projects including residential, commercial, and industrial land uses as well as large infrastructure projects. He also possesses extensive experience in soil and groundwater remediation, Risk Assessment, Record of Site Conditions, and Excess Soil Management in accordance with O. Reg. 406/19 and is a Qualified Person (QP_{ESA}) under O. Reg. 153/04 and O. Reg 406/19.

7.4. QUALIFIER

EnVision prepared this report solely for the use of the intended recipient in accordance with the professional services agreement. In the event a contract has not been executed, the parties agree that the EnVision General Terms and Conditions, which were provided prior to the preparation of this report, shall govern their business relationship.

The report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings in the assessment. The conclusions presented in this report are based on work performed by

trained, professional and technical staff, in accordance with their reasonable interpretation of current and accepted engineering and scientific practices at the time the work was performed.

The content and opinions contained in the report are based on the observations and/or information available to EnVision at the time of preparation, using investigation techniques and engineering analysis methods consistent with those ordinarily exercised by EnVision and other engineering/scientific practitioners working under similar conditions, and subject to the same time, financial and physical constraints applicable to this project.

EnVision disclaims any obligation to update this report if, after the date of this report, any conditions appear to differ significantly from those presented in this report; however, EnVision reserves the right to amend or supplement this report based on additional information, documentation or evidence.

EnVision makes no other representations whatsoever concerning the legal significance of its findings. The intended recipient is solely responsible for the disclosure of any information contained in this report. If a third party makes use of, relies on, or makes decisions in accordance with this report, said third party is solely responsible for such use, reliance or decisions. EnVision does not accept responsibility for damages, if any, suffered by any third party as a result of decisions made or actions taken by said third party based on this report.

EnVision has provided services to the intended recipient in accordance with the professional services agreement between the parties and in a manner consistent with that degree of care, skill and diligence normally provided by members of the same profession performing the same or comparable services in respect of projects of a similar nature in similar circumstances. It is understood and agreed by EnVision and the recipient of this report that EnVision provides no warranty, express or implied, of any kind. Without limiting the generality of the foregoing, it is agreed and understood by EnVision and the recipient of this report that EnVision makes no representation or warranty whatsoever as to the sufficiency of its scope of work for the purpose sought by the recipient of this report.

In preparing this report, EnVision has relied in good faith on information provided by others, as noted in the report. EnVision has reasonably assumed that the information provided is correct and EnVision is not responsible for the accuracy or completeness of such information.

Unless otherwise agreed in writing by EnVision, the Report shall not be used to express or imply warranty as to the suitability of the site for a particular purpose. EnVision disclaims any responsibility for consequential financial effects on transactions or property values, or requirements for follow-up actions /or costs. This limitations statement is considered an integral part of this report.

TABLES

Table 1A- Summary of Potentially Contaminating Activities (Old School Road Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Old School Road Portion of the Project Area.

Potentially Contaminating Activity		
30 .1	Importation of Fill Material of Unknown Quality	Project Area - It is anticipated that fill materials were brought to the Project Area during the construction of the roadway and/or during the installation of utilities. The environmental quality of the fill is not known (APEC 1).
40 .1	Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Study Area - Based on a review of aerial photographs and information obtained from the Site reconnaissance, agricultural fields were observed on neighboring lands of the Project Area. It is possible that these agricultural operations may have involved the use of pesticides; however, this is not considered a significant concern in relation to the proposed trunk sewere installation and, as such, is not considered to contribute to an APEC.
46 .1	Rail Yards, Tracks and Spurs	Project Area - The Orangeville-Brampton Railway was present in the western portion of the Project Area since 1856. (APEC 2)
A .1	Spills	Study Area - Based on review of the ERIS report, a spill of 50 L of diesel was reported on Hurontario Street approximately 100 m north of the Project Area. Due to distance form the Project Area and the small quantity, this PCA is not considered contributing to an APEC.
A .2	Spills	Project Area - Based on review of the ERIS report, various diesel spills (approximately 200 L and 500 L) were reported at the intersection of Hurontario Street and Old School Road, within the north portion of the Project Area. (APEC 3)
E .1	Application of De-Icing Compounds	Project Area - It is anticipated that de-icing compounds are applied to the Project Area seasonally for the purposes of vehicular safety. (APEC 4)

Notes:

1 - Potentially Contaminating Activity (PCA) means a use or activity set out in Column A of Table 2 of Schedule D of O.Reg 153/04

2 - A, B, C represent PCAs not specified in Table 2, Schedule D of O. Reg 153/04

3 - Red highlighting indicates that the PCA is considered contributing to an APEC

4 - PCAs have been made in reference to the Bovaird Portion of the Project Area.

Table 1B- Summary of Potentially Contaminating Activities (Orangeville Brampton Railway Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Orangeville Brampton Railway Portion of the Project Area.

Potentially Contaminating Activity		
10 .1	Commercial Autobody Shops	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance, Performance Collision Brampton, located at 105 Vankirk Drive, west adjacent of the Project Area was identified as an autobody repair facility. (APEC 5)
11 .1	Commercial Trucking and Container Terminals	Study Area - Based on review of the ERIS report, 190 Bovaird Drive, located in the east adjacent of the Project Area operated as a general freight trucking operation. (APEC 6)
12 .1	Concrete, Cement and Lime Manufacturing	Study Area - Based on review of the ERIS report, 225 Wanless Drive, located at the east adjacent of the Project Area was registered for the manufacturing of clay building material and refractory, brick, concrete, and concrete pipe brick and block. (APEC 7)
18 .1	Electricity Generation, Transformation and Power Stations	Study Area - Based on review of the ERIS report, Hydro One Brampton Networks Inc., located at 175 Sandalwood Parkway West, east adjacent of the Project Area was registered electricity power distribution company between 1992 to 2022. Operations included distribution lines and transformer stations, and dedicated generating stations. (APEC 8)
27 .1	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the ERIS report, an automotive service centre, located at 190 Bovaird Drive West was observed in the east adjacent of the Project Area. (APEC 6)
27 .2	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance, Attrell Hyundai, located at 100 Canam Crescent, west adjacent of the Project Area operated as a car dealership and an automotive service garage. (APEC 6)
27 .3	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance, Attrell Toyota, located at 110 Canam Crescent, west adjacent of the Project Area operated as a car dealership and an automotive service garage. (APEC 6)
27 .4	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the ERIS report, Brampton Transit maintenance facility was observed at 130 Sandalwood Parkway West, located in the east adjacent of the Project Area. (APEC 9)
27 .5	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the ERIS report, Brampton Go bus and Brampton Go service garage station and were located at 85 Van Kirk Drive, west adjacent of the Project Area. (APEC 5)

28 .1	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, a retail fuel storage tank was registered to Northwood Park Service Centre Inc., located at 190 Bovaird Drive West, east adjacent of the Project Area. (APEC 6)
28 .2	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, a retail fuel storage tank was registered to Butcher Engineering, located at 105 Vankirk Drive, west adjacent of the Project Area. The tank is inferred to be located adjacent to the building approximately 40 m west of the Project Area. (APEC 5)
28 .3	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, Brampton Hydro Electric/Hydro One Brampton Networks Inc., located at 175 Sandalwood Parkway West, east adjacent of the Project Area was registered under the retail fuel storage tank and fuel storage tank - historic databases for two (2) gasoline/diesel underground storage tanks (USTs). (APEC 8)
28 .4	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, Brampton Brick Limited and Roxy Construction Co Ltd., located at 225 Wanless Drive, east adjacent of the Project Area was registered under the private retail fuel storage tank, fuel storage tank and fuel storage tank - historic databases for two (2) fuel storage tank and two (2) diesel USTs. (APEC 7)
30 .1	Importation of Fill Material of Unknown Quality	Project Area - It is anticipated that fill materials were brought to the Project Area during the construction of the former railway line. The environmental quality of the fill is not known (APEC 1).
33 .1	Metal Treatment, Coating, Plating and Finishing	Study Area - Based on review of the ERIS report, The Peelle Company Limited, located at 195 Sandalwood Pky W, west adjacent of the Project Area was registered for metal window and door manufacturing between 1926 to 2022. (APEC 8)
33 .2	Metal Treatment, Coating, Plating and Finishing	Study Area - Based on review of the ERIS report, Butcher Engineering, located at 105 Vankirk Drive, west adjacent of the Project Area was registered for the manufacturing of transportation equipment. Operations included coating, engraving, heat treating and similarly processing metal, tempering, brazing, plating (including electroplating and re-chroming), polishing, sand-blasting and colouring metal and metal products. (APEC 5)
34 .1	Metal Fabrication	Study Area - Based on review of the ERIS report, Sonco Steel Tube Ltd., located at 95 Vankirk Drive, west adjacent of the Project Area was registered as a steel pipe and tube fabrication company. (APEC 5)
34 .2	Metal Fabrication	Study Area - Based on review of the ERIS report, Dymin Steel Inc. located at 133 Van Kirk Drive, west adjacent of the Project Area was registered as a steel fabrication company. (APEC 8)

40 .1	Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Study Area - Based on a review of aerial photographs and information obtained from the Site reconnaissance, agricultural fields were observed in the north portion of the neighboring lands of the Project Area. It is possible that these agricultural operations may have involved the use of pesticides; however, this is not considered a significant concern in relation to the proposed trunk sewer installation and as such is not considered to contribute to an APEC.
43 .1	Plastics (including Fibreglass) Manufacturing and Processing	Study Area - Based on review of the ERIS report, Industrial Thermo Polymers Ltd. located at 153 Van Kirk Drive , west adjacent of the Project Area was registered for Plastic Film and Sheet Manufacturing, All Other Plastic Product Manufacturing, Doll, Toy and Game Manufacturing, Urethane and Other Foam Product (except Polystyrene) Manufacturing and Polystyrene Foam Product Manufacturing. (APEC 8)
43 .2	Plastics (including Fibreglass) Manufacturing and Processing	Study Area - Based on review a review of google satellite imagery and information obtained from the Site reconnaissance, Metelix Products Inc., located at 95 Vankirk Drive, west adjacent of the Project Area was registered as a plastic blow-moulding manufacturer. (APEC 5)
46 .1	Rail Yards, Tracks and Spurs	Project Area - The Orangeville Brampton Railway and associated spurs were present in the north and central portion of the Project Area since 1856. (APEC 2)
58 .1	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Study Area - Based on review of the ERIS report, satellite imagery and information obtained from the Site reconnaissance, Region of Peel, located at 420 Railside Drive was registered as a recycling centre. The operation building is located 135 m east of the Project Area. Due to distance from the Project Area, this PCA was not considered to be contributing to an APEC.
58 .2	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Study Area - Based on review of the ERIS report, Safety-Kleen (On-Site) Inc. located at 175 Sandalwood Parkway West, east adjacent of the Project Area was registered as a Class 2 mobile PCB destruction facility in 2001. The ERIS report indicated that the Site can process up to 10,000 litres of PCB-contaminated mineral oil. (APEC 8)
A .3	Spills	Study Area - Based on review of the ERIS report, a spill of ammonia and gasoline mixture was reported at 194 Ecclestone Drive, approximately 100 m east of the Project Area. Due to distance and small quantity, this PCA is not considered to be contributing to an APEC.
A .4	Spills	Study Area - Based on review of the ERIS report, two (2) 50 L spills of engine oil were reported at 110 Canam Crescent, located 50 m west of the Project Area. Due to distance and small quantity, this PCA is not considered to be contributing to an APEC.

A .5	Spills	Study Area - Based on review of the ERIS report, a 50 L varsol spill, a 250 L spill of tar and water mix, and a 200L petroleum based oil spill were reported at located at 95 Vankirk Drive, west adjacent of the Project Area (APEC 5)
A .6	Spills	Study Area - Based on review of the ERIS report, a 50 L paint or paint related N.O.S spill was reported to Butcher Engineering located at 105 Vankirk Drive, west adjacent of the Project Area. Due to the small quantity of this spill, this PCA is not consider contributing to an APEC. (APEC 5)
A .7	Spills	Study Area - Based on review of the ERIS report, a 150 L transformer oil spill was reported to Alectra Utilities located at 440 Railside Drive, east adjacent of the Project Area. Based on information obtained from the Site reconnaissance, the spill likely occurred in the vicinity of the transformer which located along Railside Drive approximately 175 m east of the Project Area. Due to distance from the Project Area, this PCA is not considered to be contributing to an APEC.
A .8	Spills	Study Area - Based on review of the ERIS report, approximately 0.5 L turbine lubricant oil spill was reported at 153 Vankirk Drive located in the west adjacent of the Project Area. Due to the small quantity, this PCA was not considered to be contributing to an APEC.
A .9	Spills	Study Area - Based on review of the ERIS report, various spills including approximately 40-50 L of diesel fuel oil, approximately 50 L of gasoline, approximately 900 L of glycol and water mix, and approximately 160 L of transformer were reported to Hydro One Brampton Networks Inc. located at 175 Sandalwood Pky W, east adjacent of the Project Area. (APEC 8)
A .10	Spills	Study Area - Based on review of the ERIS report, a spill of approximately 20 L of hydraulic oil was reported at 156 Twin Pine Crescent, located in the west adjacent of the Project Area. Due to the limited quantity, this PCA was not considered to be contributing to an APEC.
A .11	Spills	Study Area - Based on review of the ERIS report, various spills including approximately 2300 L of diesel fuel, approximately 15 L motor oil, and approximately 15 L of hydraulic oil were reported at 225 Wanless Drive located at the east adjacent of the Project Area. (APEC 7)
B .1	PCB Storage Site	Study Area - Based on review of the ERIS report, Hydro One Brampton Networks Inc. located at 175 Sandalwood Parkway West, east adjacent of the Project Area was registered for PCB storage between 1995 to 2004. (APEC 8)

Notes:

1 - Potentially Contaminating Activity (PCA) means a use or activity set out in Column A of Table 2 of Schedule D of O.Reg 153/04

2 - A, B, C represent PCAs not specified in Table 2, Schedule D of O. Reg 153/04

3 - Red highlighting indicates that the PCA is considered contributing to an APEC

4 - PCAs have been made in reference to the Bovaird Portion of the Project Area.

Table 1C- Summary of Potentially Contaminating Activities (Bovaird Drive West Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Bovaird Drive West Portion of the Project Area.

Potentially Contaminating Activity		
27 .6	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance, Brampton Chrysler Dodge Jeep Ram located at 190 Canam Crescent, north adjacent of the Project Area operated as a car dealership and an automotive service garage. The automotive service centre is located approximately 75 m north of the Project Area. Due to the distance from the Project Area, this PCA was not considered to be contributing to an APEC.
27 .7	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance an automotive service centre was located inside the Canadian Tire, at 10031 McLaughlin Road, north adjacent of the Project Area. The service centre was located approximately 150 m north of the Project Area. Due to the distance from the Project Area, this PCA was not considered to be contributing to an APEC.
.5 28 .6 .7	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, google satellite imagery and information obtained from the Site reconnaissance, gasoline service stations have been located at 9950, 10010, and 10021 McLaughlin Road, north and south of the Project Area since the early 2000s. Each gas station was listed with at least three (3) USTs, both gasoline and diesel. (APEC 10)
30 .1	Importation of Fill Material of Unknown Quality	Project Area - It is anticipated that fill materials were brought to the Project Area during the construction of the roadway and/or during the installation of utilities. The environmental quality of the fill is not known (APEC 1).
E .1	Application of De-Icing Compounds	Project Area - It is anticipated that de-icing compounds are applied to the Project Area seasonally for the purposes of vehicular safety. (APEC 4)

Notes:

1 - Potentially Contaminating Activity (PCA) means a use or activity set out in Column A of Table 2 of Schedule D of O.Reg 153/04

2 - A, B, C represent PCAs not specified in Table 2, Schedule D of O. Reg 153/04

3 - Red highlighting indicates that the PCA is considered contributing to an APEC

4 - PCAs have been made in reference to the Bovaird Portion of the Project Area.

Table 1D- Summary of Potentially Contaminating Activities (Vodden Street Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Vodden Street Portion of the Project Area.

Potentially Contaminating Activity		
27 .8	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the ERIS report, an oil change and lubrication service, Perfect Lube, was listed at 121 Kennedy Road North, west adjacent to the Project Area. (APEC 11)
28 .8	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconassiance, a gasoline service station, ESSO, has been located at 140 Kennedy Road North, east adjacent to the Project Area since as early as 1981, and was listed with five (5) gasoline and one (1) diesel USTs. (APEC 11)
28 .9	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconassiance during the site reconnaissance, a gas station, Petro Canada, has been located at 121 Kennedy Road North, west adjacent to the Project Area since as early as 2003, and was listed with three (3) gasoline and one (1) diesel USTs. (APEC 11)
30 .1	Importation of Fill Material of Unknown Quality	Project Area - It is anticipated that fill materials were brought to the Project Area during the construction of the roadway and/or during the installation of utilities. The environmental quality of the fill is not known (APEC 1).
58 .3	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Study Area - Based on review of the ERIS report, a suspected dump was identified at the former Dale Estate, now located at 36 Vodden Street East. The ERIS report also noted that fires occurred at the site in both 1963 and 1971. According to an online article '*The Flowertown of Canada*' , the Dale Estate operated as a greenhouse business, where local residents could collect discarded flowers and plants that did not meet the company's quality standards. The dump site was not a formal landfill, but rather an area designated for disposing of excess plant material. The property has since been redeveloped into a commercial building. Based on the types of waste generated at the property as well as the redevelopment of the property, this PCA is not considered to be contributing to an APEC.
A .12	Spill	Study Area - Based on review of the ERIS report, a spill of approximately 2L of non-PCB oil was reported on the grass near the transformer box located at 47 Vodden Street East, south adjacent of the Project Area. The ERIS report noted that the spill was contained and cleaned. Based on the clean up measures taken as well as the minimal spill volume, this spill is not anticipated to be contributing to an APEC.
A .13	Spill	Study Area - Based on review of the ERIS report, a spill of approximately 50 L of mineral oil was reported at 36 Newby Court, approximately 55 m north of the Project Area. Due to distance from the Project Area, this spill is not considered to be contributing to an APEC.

E .1	Application of De-Icing Compounds	Project Area - It is anticipated that de-icing compounds are applied to the Project Area seasonally for the purposes of vehicular safety. (APEC 4)

Notes:

1 - Potentially Contaminating Activity (PCA) means a use or activity set out in Column A of Table 2 of Schedule D of O.Reg 153/04

2 - A, B, C represent PCAs not specified in Table 2, Schedule D of O. Reg 153/04

3 - Red highlighting indicates that the PCA is considered contributing to an APEC

4 - PCAs have been made in reference to the Bovaird Portion of the Project Area.

Table 1E- Summary of Potentially Contaminating Activities (Kennedy Road North/South Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Kennedy Road Portion of the Project Area.

Potentially Contaminating Activity		
2 .1	Adhesives and Resins Manufacturing, Processing and Bulk Storage	Study Area - Based on review of the ERIS report, an adhesive manufacturing facility, Mactac Canada Ltd., (and LTEE) has been located at 100 Kennedy Road South, east adjacent to the Project Area, since 1936. (APEC 12)
10 .2	Commercial Autobody Shops	Study Area - Based on review of google satellite imagery, an auto body shop, Able Auto Body, is located at 77 Kennedy Road South, west adjacent to the Project Area. (APEC 13)
27 .8	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the ERIS report, an oil change and lubrication service, Perfect Lube, was listed at 121 Kennedy Road North, west adjacent to the Project Area. (APEC 11)
27 .9	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance, auto service garages were located at 20 Kennedy Road South and 60 Eastern Avenue, east adjacent to the Project Area. (APEC 21)
27 .10	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance during the site reconnaissance, a gas station, Pauto service garages were located at 22 and 28 Kennedy Road South, east adjacent to the Project Area (APEC 20)
27 .11	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of Google Maps, Peel Auto Centre was located at 149 Clarence Street, west adjacent to the Project Area. (APEC 13)
27 .12 .13 .17 .21	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of Google Maps, various auto service garages have been located east adjacent (84 Kennedy Road South) and west adjacent (91, 95, and 99 Kennedy Road South) of the Project Area. (APEC 12)

Table 1E- Summary of Potentially Contaminating Activities (Kennedy Road North/South Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Kennedy Road Portion of the Project Area.

Potentially Contaminating Activity		
27 .14 .15 .18	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of Google Maps, various auto service garages have been located east adjacent (110 and 126 Kennedy Road South) and west adjacent (117 Kennedy Road South) of the Project Area. (APEC 14)
27 .16	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of Google Maps, an auto service garage, Thrive Auto Collision, was located at 134 Kennedy Road South, east adjacent to the Project Area. (APEC 15)
27 .19	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of Google Maps and observations during the site reconnaissance, an auto service garage was located at the Husky gas station at 253 Kennedy Road South, west adjacent to the Project Area. (APEC 16)
27 .20	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review RSC #224471, an auto service garage, AJ Trust Auto, was located at 38 Dean Street, approximately 80 m west of the Project Area. Due to distance, this PCA was not considered to be contributing to an APEC.
28 .8	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance, a gasoline service station, ESSO, has been located at 140 Kennedy Road North, east adjacent to the Project Area since as early as 1981, and was listed with five (5) gasoline and one (1) diesel USTs. (APEC 11)
28 .9	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the google satellite imagery and information obtained from the Site reconnaissance during the site reconnaissance, a gas station, Petro Canada, has been located at 121 Kennedy Road North, west adjacent to the Project Area since as early as 2003, and was listed with three (3) gasoline and one (1) diesel USTs. (APEC 11)
28 .10	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, a diesel UST was formerly listed at Parkinson Coach Lines George Murray located at 10 Kennedy Road South, east adjacent to the Project Area in 1982. The exact location of the UST is not known. (APEC 19)

Table 1E- Summary of Potentially Contaminating Activities (Kennedy Road North/South Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Kennedy Road Portion of the Project Area.

Potentially Contaminating Activity		
28 .11	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, Shell Canada Products was listed at 230 Queen Street East, west adjacent to the Project Area with waste oil and bulk oil tanks. (APEC 19)
28 .12	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, two (2) gasoline and two (2) diesel USTs were listed at Mel and Auto Centre Inc., located at 18 Kennedy Road South, east adjacent to the Project Area in 1980. (APEC 21)
28 .13	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, one (1) diesel UST was located at 32 Kennedy Road South, east adjacent to the Project Area, formerly GMF Transport (1981) and currently Maple Leaf Poultry. The location and specifications of the tank is not known. (APEC 22)
28 .14	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, one (1) gasoline and one (1) diesel USTs were listed at Budget Rent-A-Car located at 73 Kennedy Road South, west adjacent to the Project Area, in 1984. (APEC 13)
28 .15	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, a gas station, formerly Parkland Corp. and currently Husky, is located at 253 Kennedy Road South, west adjacent to the Project Area. The gas station was listed with three (3) gasoline and one (1) diesel USTs. (APEC 16)
28 .16	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, a gas station, formerly Mac's Convenience as early as 1985 and now currently ESSO was listed with at least three (3) gasoline and one (1) diesel USTs at 7995 Kennedy Road South, east adjacent to the Project Area. (APEC 17)
30 .1	Importation of Fill Material of Unknown Quality	Project Area - It is anticipated that fill materials were brought to the Project Area during the construction of the roadway and/or during the installation of utilities. The environmental quality of the fill is not known (APEC 1).
37 .1	Operation of Dry Cleaning Equipment (where chemicals are used)	Study Area - Based on review of the ERIS report, a dry cleaners, Premier Cleaners was located at 144 Kennedy Road South, east adjacent to the Project Area between 1988 and 2007. (APEC 18)

Table 1E- Summary of Potentially Contaminating Activities (Kennedy Road North/South Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Kennedy Road Portion of the Project Area.

Potentially Contaminating Activity		
37 .2	Operation of Dry Cleaning Equipment (where chemicals are used)	Study Area - Based on review of Google Maps, a dry cleaners, Total Laundry Care, was located at 30 Rambler Drive, approximately 40 m west of the Project Area. (APEC 23)
37 .3	Operation of Dry Cleaning Equipment (where chemicals are used)	Study Area - Based on review of the ERIS report, a dry cleaners, Tony's Custom Cleaners, was located at 400 Steeles Avenue East, wets adjacent to the Project Area between 1986 and 1998. (APEC 17)
37 .4	Operation of Dry Cleaning Equipment (where chemicals are used)	Study Area - Based on review of RSC #224471, a dry cleaners, was formerly located at 44 Deans Street, approximately 60 m west of the Project Area. (APEC 14)
43 .1	Plastics (including Fibreglass) Manufacturing and Processing	Study Area - Based on review of the ERIS report, a plastic manufacturing facility, AT Plastics Inc. was located at 134 and 142 Kennedy Road South, east adjacent to the Project Area between 1986 and 2011. This property was also listed for PCB storage. (APEC 15)
43 .2	Plastics (including Fibreglass) Manufacturing and Processing	Study Area - Based of review of RSC #224471, a plastic manufacturing facility was identified at 107 Kennedy Road South, west adjacent to the Project Area. (APEC 14)
46 .2	Rail Yards, Tracks and Spurs	Project Area - The Toronto and Goderich Railway intersects the central area of the Kennedy Road Portion of the Project Area since 1856. Although the railway currently is orientated above the roadway (Kennedy Road South), it is suspected that the railway was once at grade. (APEC 27)
51 .1	Solvent Manufacturing, Processing and Bulk Storage	Study Area - Based on review of the ERIS report, a solvent UST was registered to AT Plastics Inc. was located at 134 and 142 Kennedy Road South, east adjacent to the Project Area. The exact location of the UST is not known. (APEC 15)
51 .2	Solvent Manufacturing, Processing and Bulk Storage	Study Area - Based of review of RSC #224471, a former solvent handling facility was identified at 109 Kennedy Road South, at least 50 m west of the Project Area. (APEC 14)

Table 1E- Summary of Potentially Contaminating Activities (Kennedy Road North/South Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Kennedy Road Portion of the Project Area.

Potentially Contaminating Activity		
51 .3	Solvent Manufacturing, Processing and Bulk Storage	Study Area - Based on review of the ERIS report, a paint dip tank for the application of solvents was identified at the automotive manufacturing facility, Arvin Meritor Canada, located at 350 First Gulf Boulevard, east adjacent to the Project Area. (APEC 24)
52 .1	Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Study Area - Based on review of the ERIS report, an equipment repair facility, Stephenson's Rent-all Inc., was located at 26 Kennedy Road South, east adjacent to the Project Area. (APEC 20)
55 .1	Transformer Manufacturing, Processing and Use	Study Area - Based on observations during the site reconnaissance, a transformer was noted to be located on the boulevard between Kennedy Road South and the gas station at 7995 Kennedy Road South, east adjacent to the Project Area. (APEC 17)
57 .1	Vehicles and Associated Parts Manufacturing	Study Area - Based on review of the ERIS report, a motor vehicle body manufacturing facility, Grumman Olson Industries Inc., was located at 30 Kennedy Road South, east adjacent to the Project Area in 1970. (APEC 20)
57 .2	Vehicles and Associated Parts Manufacturing	Study Area - Based on review of the ERIS report, an automotive manufacturing facility, Arvin Meritor Canada, was located at 350 First Gulf Boulevard, east adjacent to the Project Area between at least 2004 and 2016. (APEC 24)
A .14	Spills	Study Area - Based on review pf the ERIS report, a solvent UST described to be below the water table, had leaked at 134 Kennedy Road South, east adjacent to the Project Area. The exact location of the UST is not known. (APEC 15)
A .15	Spills	Study Area - Based on review of the ERIS report, a spill of perchloroethylene to the ground and catch basin was reported at 144 Kennedy Road, east adjacent to the Project Area. (APEC 18)

Table 1E- Summary of Potentially Contaminating Activities (Kennedy Road North/South Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Kennedy Road Portion of the Project Area.

Potentially Contaminating Activity		
A .16	Spills	Study Area - Based on review of the ERIS report, a 91 L spill of diesel was reported to have spilled from a transport truck to the ground at 174 Kennedy Road South, east adjacent to the Project Area. Due to the unknowns about the location of the spill, the spill is considered to be contributing to an APEC as a conservative measure. (APEC 16)
A .17	Spills	Project Area - Based on review of the ERIS report, various diesel spills (greater than 150 L) were reported at the intersection of Kennedy Road South and Steeles Avenue East within the Project Area. (APEC 17)
A .18	Spills	Study Area - Based on review of the ERIS report, a spill of non-PCB mineral oil was reported by Electra Utilities Corp. at 78 Hartford Trail, approximately 75 m west of the Project Area. Due to distance, this PCA is not considered to be contributing to an APEC.
B .1	PCB Storage Site	Study Area - Based on review of the ERIS report, Canada Cup Inc. located at 228 Queen Street East, approximately 50 m west of the Project Area was listed as a PCB storage site. Due to the distance from the Project Area, the fact that the site is registered for PCB storage and there are no spill reports associated with this site, this PCA is not considered to be contributing to an APEC.
B .2	PCB Storage Site	Study Area - Based on review of the ERIS report, AT Plastics Inc. located at 134 and 142 Kennedy Road South, east adjacent to the Project Area was registered as a PCB storage site between 1990 and 1996. This property was identified as PCA 43.1 related to plastic manufacturing and considered to contribute to APEC 58. While impacts related to PCB storage is not considered likely, PCBs have been added as a COPC to (APEC 15)
B .3	PCB Storage Site	Study Area - Based on review of the ERIS report, AT Plastics Inc. located at 174 Kennedy Road South, east adjacent to the Project Area was registered as a PCB storage site between 1992 to 2008. (APEC 16)
C .1	Miscellaneous Manufacturing	Study Area - Based on review of the ERIS report, various manufacturing operations ere listed at 110 and 114 Kennedy Road South, east adjacent to the Project Area, including Peel Fence Systems Inc., and The Door Factory II, with waste generation records. (APEC 14)

Table 1E- Summary of Potentially Contaminating Activities (Kennedy Road North/South Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Kennedy Road Portion of the Project Area.

Potentially Contaminating Activity		
C .2	Miscellaneous Manufacturing	Study Area - Based on review of the ERIS report, a Tabacco manufacturing facility, Benson & Hedges Ltd., with various waste generation records, including halogenated solvents, petroleum distillates, and paints/pigments/coatings, was located at 174 Kennedy Road South between 1961 and 2014. This property was also listed a PCB storage site. (APEC 16)
C .3	Miscellaneous Manufacturing	Study Area - Based on review of the ERIS report, T.S.T. Enterprises, was listed for Showcase, Partition, Shelving and Locker Manufacturing, Sign Manufacturing, and All Other Miscellaneous Chemical Product Manufacturing, at 365 Kennedy Road South, west adjacent to the Study Area. (APEC 25)
D .1	Welding or Machine Shop	Study Area - Based on review of the ERIS report, a machine shop, E J Machine Co Ltd., was located at 158 Kennedy Road South, east adjacent to the Project Area. (APEC 26)
E .1	Application of De-Icing Compounds	Project Area - It is anticipated that de-icing compounds are applied to the Project Area (all six (6) portions) seasonally for the purposes of vehicular safety. (APEC 5)

Notes:

1 - Potentially Contaminating Activity (PCA) means a use or activity set out in Column A of Table 2 of Schedule D of O.Reg 153/04

2 - A, B, C represent PCAs not specified in Table 2, Schedule D of O. Reg 153/04

3 - Red highlighting indicates that the PCA is considered contributing to an APEC

4 - PCAs have been made in reference to the Bovaird Portion of the Project Area.

Table 1F- Summary of Potentially Contaminating Activities (Queen Street East Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Queen Street Portion of the Project Area.

Potentially Contaminating Activity		
10 .3	Commercial Autobody Shops	Study Area - Based on review of RSC #224566, an autobody shop with a spray booth was listed at 241 Queen Street East, south adjacent to the Project Area. Based on RSC #224566, a Phase Two was conducted on the property and identified PHC impacts within the autobody shop. A remedial excavation was completed on the property which concluded in confirmatory samples that met the applicable SCS, around the formerly impacted area. As such, the PCA is considered to have been investigated and is not considered to be contributing to an APEC for the Project Area.
10 .4	Commercial Autobody Shops	Study Area - Based on review of google satellite imagery, an auto body shop was located within the Ford auto sales business at 300 Queen Street East, north adjacent to the Project Area. (APEC 28)
27 .22	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of RSC #224566, an auto service garage was listed at 241 Queen Street East, south adjacent to the Project Area. Based on RSC #224566, a Phase Two was conducted on the property and identified PHC impacts within the auto service garage area. A remedial excavation was completed on the property which concluded in confirmatory samples that met the applicable SCS, around the formerly impacted area. As such, the PCA is considered to have been investigated and is not considered to be contributing to an APEC for the Project Area.
27 .23	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of Google Maps, an auto service garage, Speedy Auto, is located at 251 Queen Street East, south adjacent to the Project Area. (APEC 28)
27 .24	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Study Area - Based on review of Google Maps, an auto service garage, Auto Park, is located at 320 Queen Street East, north adjacent to the Project Area. (APEC 29)
28 .10	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, a diesel UST was formerly listed at Parkinson Coach Lines George Murray located at 10 Kennedy Road South, approximately 50 m north of the Project Area in 1982. The exact location of the UST is not known. (APEC 19)
28 .11	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, Shell Canada Products was listed at 230 Queen Street East, north adjacent to the Project Area with waste oil and bulk oil tanks. (APEC 19)

Table 1F- Summary of Potentially Contaminating Activities (Queen Street East Portion)

(Refer to Table 2, Schedule D, O. Reg. 153/04)

PCAs have been made in reference to the Queen Street Portion of the Project Area.

Potentially Contaminating Activity		
28 .17	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, Canadian Tire Corp. Ltd., located at 252 Queen Street East, north adjacent to the Project Area was registered with five (5) gasoline and four (4) other USTs, which were installed as early as 1992. Although, evidence of a gas station was not observed in the aerial photographs at this location, the PCA is considered to contribute to an APEC as a conservative measure. (APEC 30)
28 .18	Gasoline and Associated Products Storage in Fixed Tanks	Study Area - Based on review of the ERIS report, one (1) gasoline and one (1) waste oil USTs were listed at John Logan Chevrolet Olds Inc., located at 241 Queen Street East, south adjacent to the Project Area, installed in 1984. Based on RSC #224566, soil and groundwater were tested in the vicinity of the tanks and no impacts were found. As such, the PCA is considered to have been investigated and is not considered to be contributing to an APEC for the Project Area.
30 .1	Importation of Fill Material of Unknown Quality	Project Area - It is anticipated that fill materials were brought to the Project Area (all six (6) portions) during the construction of the roadway and/or during the installation of utilities. The environmental quality of the fill is not known (APEC 1).
34 .3	Metal Fabrication	Study Area - Based on review of the ERIS report, a metal fabrication facility, Amsco Canada Ltd. was listed at 255 Queen Street East, south adjacent to the Project Area, between at least 1986 and 1998. (APEC 28)
B .1	PCB Storage Site	Study Area - Based on review of the ERIS report, Canada Cup Inc. located at 228 Queen Street East, approximately 50 m west of the Project Area was listed as a PCB storage site. Due to the distance from the Project Area and the low mobility of PCBs, this PCA is not considered to be contributing to an APEC.
E .1	Application of De-Icing Compounds	Project Area - It is anticipated that de-icing compounds are applied to the Project Area (all six (6) portions) seasonally for the purposes of vehicular safety. (APEC 4)

Notes:

1 - Potentially Contaminating Activity (PCA) means a use or activity set out in Column A of Table 2 of Schedule D of O.Reg 153/04

2 - A, B, C represent PCAs not specified in Table 2, Schedule D of O. Reg 153/04

3 - Red highlighting indicates that the PCA is considered contributing to an APEC

4 - PCAs have been made in reference to the Bovaird Portion of the Project Area.

Table 2A - Areas of Potential Environmental Concern (Old School Road Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entire Project Area	30	Importation of Fill Material of Unknown Quality	on-site	M&ORPs, PHCs & BTEX, PAHs	Soil
APEC 2	West portion of the Project Area	46	Rail Yards, Tracks and Spurs	on-site	M&ORPs, PAHs, OCs, PCBs	Soil
APEC 3	East portion of the Project Area	A	Spills	on-site	PHCs, BTEX, VOCs	Soil
APEC 4	Entire Project Area	E	Application of De-Icing Compounds	on-site	electrical conductivity, SAR	Soil

Notes:

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,
(a) identification of past or present uses on, in or under the phase one property, and
(b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs - Acid Base Neutral Compounds
CPs - Chlorophenyls
1, 4 - Dioxane
Dioxins/Furans, PCDDs/PCDFs
OCs - Organochlorine Pesticides
PHCs - Petroleum Hydrocarbons
PCBs - Polychlorinated Biphenyls
PAHs - Polycyclic Aromatic Hydrocarbons
THMs - Trihalomethanes
VOCs - Volatile Organic Compounds
BTEX - Benzene, Toluene, Ethylbenzene, Xylenes
Ca, Mg - Calcium, Magnesium
Metals
As, Sb, Se - Arsenic, Antimony, Selenium
Electrical Conductivity
B-HWS - Boron (Hot Water Soluable)
Cr (VI) - Hexavalent Chromium
SAR - Sodium Adsorption Ratio
Na - Sodium
CN^- - Cyanide
Hg - Mercury
Methyl Mercury
High/Low pH

Table 2B - Areas of Potential Environmental Concern (Orangeville Brampton Railway Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entire Project Area	30	Importation of Fill Material of Unknown Quality	on-site	M&ORPs, PHCs, BTEX, PAHs	Soil
APEC 2	Entire Project Area	46	Rail Yards, Tracks and Spurs	on-site	M&ORPs, PAHs, OCs, PCBs	Soil
APEC 5	South of Sandalwood Parkway West	10	Commercial Autobody Shops	off-site	M&ORPs, PHCs, BTEX, VOCs	Soil
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		33	Metal Treatment, Coating, Plating and Finishing		PHCs, BTEX, VOCs,	
		34	Metal Fabrication		PHCs, BTEX, sVOCs	
		43	Plastics (including Fibreglass) Manufacturing and Processing		PHCs, BTEX, VOCs, sVOCs	
		A	Spills		PHCs, BTEX, VOCs	
APEC 6	North of Bovaird Drive West	11	Commercial Trucking and Container Terminals	off-site	M&ORPs, PHCs, BTEX, PAHs	Soil
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	

Table 2B - Areas of Potential Environmental Concern (Orangeville Brampton Railway Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 7	South of Wanless Drive	12	Concrete, Cement and Lime Manufacturing	off-site	M&ORPs, PHCs, BTEX	Soil
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		A	Spills		PHCs, BTEX, VOCs	
APEC 8	South of Sandalwood Parkway West	18	Electricity Generation, Transformation and Power Stations	off-site	M&ORPs, PHCs, BTEX, VOCs, PCBs	Soil
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		33	Metal Treatment, Coating, Plating and Finishing		PHCs, BTEX, VOCs,	
		34	Metal Fabrication		PHCs, BTEX, sVOCs	
		43	Plastics (including Fibreglass) Manufacturing and Processing		PHCs, BTEX, , VOCs, sVOCs	
		58	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners		PCBs	
		A	Spills		PHCs, BTEX, VOCs	
		B	PCB Storage Site		PCBs	
APEC 9	North of Sandalwood Parkway West	27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	off-site	M&ORPS, PHCs, BTEX, VOCs, PAHs	Soil

Notes:

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,

(a) identification of past or present uses on, in or under the phase one property, and

(b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs - Acid Base Neutral Compounds
CPs - Chlorophenyls
1, 4 - Dioxane
Dioxins/Furans, PCDDs/PCDFs
OCs - Organochlorine Pesticides
PHCs - Petroleum Hydrocarbons
PCBs - Polychlorinated Biphenyls
PAHs - Polycyclic Aromatic Hydrocarbons
THMs - Trihalomethanes
VOCs - Volatile Organic Compounds
BTEX - Benzene, Toluene, Ethylbenzene, Xylenes
Ca, Mg - Calcium, Magnesium
Metals
As, Sb, Se - Arsenic, Antimony, Selenium
Electrical Conductivity
B-HWS - Boron (Hot Water Soluable)
Cr (VI) - Hexavalent Chromium
SAR - Sodium Adsorption Ratio
Na - Sodium
CN^- - Cyanide
Hg - Mercury
Methyl Mercury
High/Low pH

Table 2C - Areas of Potential Environmental Concern (Bovaird Drive West Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entire Project Area	30	Importation of Fill Material of Unknown Quality	on-site	M&ORPs, PHCs, BTEX, PAHs	Soil
APEC 4	Entire Project Area	E	Application of De-Icing Compounds	on-site	electrical conductivity, SAR	Soil
APEC 10	East and west of McLaughlin Road North	28	Gasoline and Associated Products Storage in Fixed Tanks	off-site	M&ORPs, PHCs, BTEX, VOCs, PAHs	Soil
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	Soil
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	Soil

Notes:

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,
(a) identification of past or present uses on, in or under the phase one property, and
(b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs - Acid Base Neutral Compounds
CPs - Chlorophenyls
1, 4 - Dioxane
Dioxins/Furans, PCDDs/PCDFs
OCs - Organochlorine Pesticides
PHCs - Petroleum Hydrocarbons
PCBs - Polychlorinated Biphenyls
PAHs - Polycyclic Aromatic Hydrocarbons
THMs - Trihalomethanes
VOCs - Volatile Organic Compounds
BTEX - Benzene, Toluene, Ethylbenzene, Xylenes
Ca, Mg - Calcium, Magnesium
Metals
As, Sb, Se - Arsenic, Antimony, Selenium
Electrical Conductivity
B-HWS - Boron (Hot Water Soluable)
Cr (VI) - Hexavalent Chromium
SAR - Sodium Adsorption Ratio
Na - Sodium
CN^- - Cyanide
Hg - Mercury
Methyl Mercury
High/Low pH

Table 2D - Areas of Potential Environmental Concern (Vodden Street East/West Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entire Project Area	30	Importation of Fill Material of Unknown Quality	on-site	M&ORPs, PHCs, BTEX, PAHs	Soil
APEC 5	Entire Project Area	E	Application of De-Icing Compounds	on-site	electrical conductivity, SAR	Soil
APEC 11	North and south of Vodden Street East	27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	off-site	M&ORPs, PHCs, BTEX, VOCs, PAHs	Soil
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	

Notes:

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,
(a) identification of past or present uses on, in or under the phase one property, and
(b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs - Acid Base Neutral Compounds
CPs - Chlorophenyls
1, 4 - Dioxane
Dioxins/Furans, PCDDs/PCDFs
OCs - Organochlorine Pesticides
PHCs - Petroleum Hydrocarbons
PCBs - Polychlorinated Biphenyls
PAHs - Polycyclic Aromatic Hydrocarbons
THMs - Trihalomethanes
VOCs - Volatile Organic Compounds
BTEX - Benzene, Toluene, Ethylbenzene, Xylenes
Ca, Mg - Calcium, Magnesium
Metals
As, Sb, Se - Arsenic, Antimony, Selenium
Electrical Conductivity
B-HWS - Boron (Hot Water Soluable)
Cr (VI) - Hexavalent Chromium
SAR - Sodium Adsorption Ratio
Na - Sodium
CN^- - Cyanide
Hg - Mercury
Methyl Mercury
High/Low pH

Table 2E - Areas of Potential Environmental Concern (Kennedy Road North/South Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entire Project Area	30	Importation of Fill Material of Unknown Quality	on-site	M&ORPs, PHCs, BTEX, PAHs	Soil
APEC 5	Entire Project Area	E	Application of De-Icing Compounds	on-site	electrical conductivity, SAR	Soil
APEC 11	North and south of Vodden Street East	27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	off-site	M&ORPs, PHCs, BTEX, VOCs, PAHs	Soil
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		28	Gasoline and Associated Products Storage in Fixed Tanks	off-site	M&ORPs, PHCs, BTEX, VOCs, PAHs	
APEC 12	North of Dean Street	2	Adhesives and Resins Manufacturing, Processing and Bulk Storage	off-site	PHCs, BTEX, VOCs	Soil
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
APEC 13	North and south of Clarence Street	10	Commercial Autobody Shops	off-site	M&ORPs, PHCs, BTEX, VOCs,	Soil
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	

Table 2E - Areas of Potential Environmental Concern (Kennedy Road North/South Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 13	North and south of Clarence Street	27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	off-site	M&ORPs, PHCs, BTEX, VOCs, PAHs	Soil
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, VOCs, PAHs	
APEC 14	Between Dean Street and Stafford Street	27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	off-site	M&ORPs, PHCs, BTEX, VOCs, PAHs	Soil
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs, PAHs	
		37	Operation of Dry Cleaning Equipment (where chemicals are used)		PHCs, BTEX, VOCs	
		43	Plastics (including Fibreglass) Manufacturing and Processing		PHCs, BTEX, VOCs, sVOCs	
		51	Solvent Manufacturing, Processing and Bulk Storage		PHCs, BTEX, VOCs	
		C	Miscellaneous Manufacturing		M&ORPs, PHCs, BTEX, VOCs, PAHs	
APEC 15	North and south of Tullamore Road	27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	off-site	M&ORPs, PHCs, BTEX, VOCs, PAHs	Soil
		43	Plastics (including Fibreglass) Manufacturing and Processing		PHCs, BTEX, VOCs, sVOCs	
		51	Solvent Manufacturing, Processing and Bulk Storage		PHCs, BTEX, VOCs	

Table 2E - Areas of Potential Environmental Concern (Kennedy Road North/South Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted

APEC 27	North of Clarence Street	46	Rail Yards, Tracks and Spurs	on-site	M&ORPs, PHCs & BTEX, PCBs	Soil

Notes:

Table 2E - Areas of Potential Environmental Concern (Kennedy Road North/South Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,
(a) identification of past or present uses on, in or under the phase one property, and
(b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs - Acid Base Neutral Compounds
CPs - Chlorophenyls
1, 4 - Dioxane
Dioxins/Furans, PCDDs/PCDFs
OCs - Organochlorine Pesticides
PHCs - Petroleum Hydrocarbons

PCBs - Polychlorinated Biphenyls
PAHs - Polycyclic Aromatic Hydrocarbons
THMs - Trihalomethanes
VOCs - Volatile Organic Compounds
BTEX - Benzene, Toluene, Ethylbenzene, Xylenes
Ca, Mg - Calcium, Magnesium

Metals
As, Sb, Se - Arsenic, Antimony, Selenium
Electrical Conductivity
B-HWS - Boron (Hot Water Soluable)
Cr (VI) - Hexavalent Chromium
SAR - Sodium Adsorption Ratio

Na - Sodium
CN^- - Cyanide
Hg - Mercury
Methyl Mercury
High/Low pH

Table 2F - Areas of Potential Environmental Concern (Queen Street East Portion)

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern (APEC)	Location of APEC	Potentially Contaminating Activity (PCA)		Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entire Project Area	30	Importation of Fill Material of Unknown Quality	on-site	M&ORPs, PHCs, BTEX, PAHs	Soil
APEC 5	Entire Project Area	E	Application of De-Icing Compounds	on-site	electrical conductivity, SAR	Soil
APEC 19	West portion of Queen Street East (east of Kennedy Road North)	28	Gasoline and Associated Products Storage in Fixed Tanks	off-site	M&ORPs, PHCs, BTEX, PAHs	Soil
		28	Gasoline and Associated Products Storage in Fixed Tanks		M&ORPs, PHCs, BTEX, PAHs	
APEC 28	East of Hansen Road North	10	Commercial Autobody Shops	off-site	M&ORPs, PHCs, BTEX, VOCs	Soil
		27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, VOCs	
		34	Metal Fabrication		M&ORPs, PHCs, BTEX, PAHs	
APEC 29	West of Rutherford Road North	27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		M&ORPs, PHCs, BTEX, PAHs	Soil
APEC 30	East of Kennedy Road North	28	Gasoline and Associated Products Storage in Fixed Tanks	off-site	M&ORPs, PHCs, BTEX, PAHs	Soil

Notes:

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,
(a) identification of past or present uses on, in or under the phase one property, and
(b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Note:	Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0. For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report: https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2023&name=7302		

NPRI ID Substances Summary

CAS No:	NA - M09	**Is PAH?:**	FALSE
Is VOC?:	FALSE	**NPRI:**	TRUE
Is DF?:	FALSE		
Name English:	PM10 - Particulate Matter <= 10 Micrometers		
Name French:	PM10 - Matière particulaire <= 10 micromètres		
Sort English:	PM10 - Particulate Matter <= 10 Micrometers		
Sort French:	PM10 - Matière particulaire <= 10 micromètres		

CAS No:	7664-39-3	**Is PAH?:**	FALSE
Is VOC?:	FALSE	**NPRI:**	TRUE
Is DF?:	FALSE		
Name English:	Hydrogen fluoride		
Name French:	Fluorure d'hydrogène		
Sort English:	Hydrogen fluoride		

Sort French: Fluorure d'hydrogène

CAS No: NA - M10 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: PM2.5 - Particulate Matter <= 2.5 Micrometers
Name French: PM2,5 - Matière particulaire <= 2,5 micromètres
Sort English: PM2.5 - Particulate Matter <= 2.5 Micrometers
Sort French: PM2,5 - Matière particulaire <= 2,5 micromètres

CAS No: NA - M08 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: Total particulate matter
Name French: Matière particulaire totale
Sort English: PM - Total Particulate Matter
Sort French: PM - Particules totales

CAS No: 7446-09-5 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: Sulphur dioxide
Name French: Dioxyde de soufre
Sort English: Sulphur dioxide
Sort French: Dioxyde de soufre

CAS No: NA - M16 **Is PAH?:** FALSE
Is VOC?: TRUE **NPRI:** TRUE
Is DF?: FALSE
Name English: Volatile Organic Compounds (VOCs)
Name French: Composés organiques volatils (COV)
Sort English: Volatile Organic Compounds (VOCs)
Sort French: Composés organiques volatils (COV)

CAS No: 630-08-0 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: Carbon monoxide
Name French: Monoxyde de carbone
Sort English: Carbon monoxide
Sort French: Oxyde de carbone (monoxyde de carbone)

CAS No: 11104-93-1 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: Nitrogen oxides (expressed as nitrogen dioxide)
Name French: Oxydes d'azote (exprimés en dioxyde d'azote)
Sort English: Nitrogen oxides (expressed as nitrogen dioxide)
Sort French: Oxydes d'azote (exprimés en dioxyde d'azote)

CAS No: 7647-01-0 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: Hydrochloric acid
Name French: Acide chlorhydrique
Sort English: Hydrochloric acid
Sort French: Acide chlorhydrique

Primary NAICS Details

NAICS Code: 221122
Record Year: 1997
Key Indus Sector En: Electricity
Key Indus Sector Fr: Électricité
NAICS Title En: Electric Power Distribution
NAICS Title Fr: Distribution d'électricité
Start Date: 1993
End Date: 2001

NAICS Description En:

This Canadian industry comprises establishments primarily engaged in the distribution of electric power to the individual user or consumer. The electric power distribution system includes distribution lines and transformer stations integral to power distribution, as well as any dedicated generating stations. Electric power brokers and agents, that arrange the sale of electricity over power distribution systems operated by others, are included.

NAICS Description Fr:

Cette classe canadienne comprend les établissements dont l'activité principale consiste à distribuer de l'électricité aux usagers ou consommateurs individuels. La distribution s'effectue par des lignes et par des transformateurs qui font partie intégrante du système, ainsi que, éventuellement, par des centrales spécialisées. Sont inclus les négociants et les courtiers en électricité qui négocient la vente d'électricité par l'entremise de réseaux de distribution d'énergie exploités par d'autres.

This Canadian industry comprises establishments primarily engaged in the distribution of electric power to the individual user or consumer. The electric power distribution system includes distribution lines and transformer stations integral to power distribution, as well as any dedicated generating stations. Electric power brokers and agents, that arrange the sale of electricity over power distribution systems operated by others, are included.

NAICS Description Fr:

Cette classe canadienne comprend les établissements dont l'activité principale consiste à distribuer de l'électricité aux usagers ou consommateurs individuels. La distribution s'effectue par des lignes et par des transformateurs qui font partie intégrante du système, ainsi que, éventuellement, par des centrales spécialisées. Sont inclus les négociants et les courtiers en électricité qui négocient la vente d'électricité par l'entremise de réseaux de distribution d'énergie exploités par d'autres.

Primary NAICS Details

NAICS Code: 221122
Record Year: 2002
Key Indus Sector En: Electricity
Key Indus Sector Fr: Électricité
NAICS Title En: Electric Power Distribution
NAICS Title Fr: Distribution d'électricité
Start Date: 2002
End Date: 2006

NAICS Description En:

This Canadian industry comprises establishments primarily engaged in the distribution of electric power to the individual user or consumer. The electric power distribution system includes distribution lines and transformer stations integral to power distribution, as well as any dedicated generating stations. Electric power brokers and agents, that arrange the sale of electricity over power distribution systems operated by others, are included.

NAICS Description Fr:

Cette classe canadienne comprend les établissements dont l'activité principale consiste à distribuer de l'électricité aux usagers ou consommateurs individuels. La distribution s'effectue par des lignes et par des transformateurs qui font partie intégrante du système, ainsi que, éventuellement, par des

centrales spécialisées. Sont inclus les négociants et les courtiers en électricité qui négocient la vente d'électricité par l'entremise de réseaux de distribution d'énergie exploités par d'autres.

Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2023&name=7190

Waste Detail(s)

Waste Class: 232 L
Waste Class Name: Polymeric resins

Waste Detail(s)

Waste Class: 145 H
Waste Class Name: Wastes from the use of pigments, coatings and paints

Waste Detail(s)

Waste Class: 148 I
Waste Class Name: Misc. wastes and inorganic chemicals

Waste Detail(s)

Waste Class: 269 L
Waste Class Name: Organic non-halogenated pesticide and herbicide wastes

Waste Detail(s)

Waste Class: 147 L
Waste Class Name: Chemical fertilizer wastes

Waste Detail(s)

Waste Class: 145 I
Waste Class Name: Wastes from the use of pigments, coatings and paints

Waste Detail(s)

Waste Class: 146 L
Waste Class Name: Other specified inorganic sludges, slurries or solids

NPRI ID: 2703 **Latitude:** 43.7082
Facility ID: 223920;284152;341502;368431;417952;432250;444369 **Longitude:** -79.806
Facility Name: BRAMPTON
Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2023&name=2703

NPRI ID Substances Summary

CAS No: NA - 03 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: Cadmium (and its compounds)
Name French: Cadmium (et ses composés)
Sort English: Cadmium (and its compounds)
Sort French: Cadmium (et ses composés)

CAS No: 100-41-4 **Is PAH?:** FALSE
Is VOC?: TRUE **NPRI:** TRUE
Is DF?: FALSE
Name English: Ethylbenzene
Name French: Éthylbenzène
Sort English: Ethylbenzene
Sort French: Éthylbenzène

CAS No: NA - 08 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: Lead (and its compounds)
Name French: Plomb (et ses composés)
Sort English: Lead (and its compounds)
Sort French: Plomb (et ses composés)

CAS No: NA - 05 **Is PAH?:** FALSE
Is VOC?: FALSE **NPRI:** TRUE
Is DF?: FALSE
Name English: Cobalt (and its compounds)
Name French: Cobalt (et ses composés)
Sort English: Cobalt (and its compounds)
Sort French: Cobalt (et ses composés)

CAS No: 95-63-6 **Is PAH?:** FALSE
Is VOC?: TRUE **NPRI:** TRUE
Is DF?: FALSE
Name English: 1,2,4-Trimethylbenzene
Name French: 1,2,4-Triméthylbenzène
Sort English: Trimethylbenzene:1,2,4-
Sort French: Triméthylbenzène:1,2,4-

CAS No:	NA - 19	**Is PAH?:**	FALSE
Is VOC?:	FALSE	**NPRI:**	TRUE
Is DF?:	FALSE		
Name English:	Hexavalent chromium (and its compounds)		
Name French:	Chrome hexavalent (et ses composés)		
Sort English:	Hexavalent chromium (and its compounds)		
Sort French:	Chrome hexavalent (et ses composés)		

CAS No:	111-76-2	**Is PAH?:**	FALSE
Is VOC?:	TRUE	**NPRI:**	TRUE
Is DF?:	FALSE		
Name English:	2-Butoxyethanol		
Name French:	2-Butoxyéthanol		
Sort English:	Butoxyethanol:2-		
Sort French:	Butoxyéthanol:2-		

CAS No:	1330-20-7	**Is PAH?:**	FALSE
Is VOC?:	TRUE	**NPRI:**	TRUE
Is DF?:	FALSE		
Name English:	Xylene (all isomers)		
Name French:	Xylène (tous les isomères)		
Sort English:	Xylene (all isomers)		
Sort French:	Xylène (tous les isomères)		

CAS No:	1330-20-7	**Is PAH?:**	FALSE
Is VOC?:	TRUE	**NPRI:**	TRUE
Is DF?:	FALSE		
Name English:	Xylene (mixed isomers)		
Name French:	Xylène (mélanges d'isomères)		
Sort English:	Xylene (mixed isomers)		
Sort French:	Xylène (mélanges d'isomères)		

CAS No:	108-88-3	**Is PAH?:**	FALSE
Is VOC?:	TRUE	**NPRI:**	TRUE
Is DF?:	FALSE		
Name English:	Toluene		
Name French:	Toluène		
Sort English:	Toluene		
Sort French:	Toluène		

CAS No:	78-93-3	**Is PAH?:**	FALSE
Is VOC?:	TRUE	**NPRI:**	TRUE
Is DF?:	FALSE		
Name English:	Methyl ethyl ketone		
Name French:	Méthyléthylcétone		
Sort English:	Methyl ethyl ketone		
Sort French:	Méthyléthylcétone

Waste Class Name:	Misc. wastes and inorganic chemicals

Waste Detail(s)

Waste Class: 261 A
Waste Class Name: Pharmaceuticals

Waste Detail(s)

Waste Class: 145 B
Waste Class Name: Wastes from the use of pigments, coatings and paints

Waste Detail(s)

Waste Class: 213 I
Waste Class Name: Petroleum distillates

Waste Detail(s)

Waste Class: 121 C
Waste Class Name: Alkaline slutions - containing heavy metals

Waste Detail(s)

Waste Class: 251 L
Waste Class Name: Waste oils/sludges (petroleum based)

Waste Detail(s)

Waste Class: 221 I
Waste Class Name: Light fuels

Waste Detail(s)

Waste Class: 252 L
Waste Class Name: Waste crankcase oils and lubricants

Waste Detail(s)

Waste Class: 212 L
Waste Class Name: Aliphatic solvents and residues

Waste Detail(s)

Waste Class: 312 P
Waste Class Name: Pathological wastes

Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2023&name=4774

Key Indus Sector En:	Other Manufacturing		
Key Indus Sector Fr:	Autres fabrication		
NAICS Title En:	Coating, engraving, cold and heat treating and allied activities		
NAICS Title Fr:	Revêtement, gravure, traitement thermique et par le froid, et activités analogues		

NAICS Description En:

This Canadian industry comprises establishments primarily engaged in coating, engraving, heat treating and similarly processing metal. These activities often involve heating the metal, and the purpose is often to harden it. In general, the hardening of metal is included. Other activities of this industry include tempering, brazing, plating (including electroplating and re-chroming), polishing, sand-blasting and colouring metal and metal products. Establishments that perform these processes on other materials, such as plastics, in addition to metals, as well as establishments primarily engaged in plating with precious metal for the trade are included.

NAICS Description Fr:

Cette classe canadienne comprend les établissements dont l'activité principale consiste à recouvrir, graver, travailler à chaud ou traiter le métal d'autres façons semblables. Ces activités consistent souvent à chauffer le métal, en général pour le durcir. Habituellement, le durcissement du métal est compris. Parmi les autres activités de cette classe canadienne, notons le trempage, le brasage, le placage (y compris la galvanoplastie et le chromage), le polissage, le sablage et la coloration du métal et des produits métalliques. Sont inclus les établissements qui effectuent ces opérations sur d'autres matières, telles que le plastique, en plus des métaux, ainsi que les établissements dont l'activité principale consiste à appliquer des placages en métaux précieux sur des produits destinés à être vendus.

Key Indus Sector En:	Other Manufacturing		
Key Indus Sector Fr:	Autres fabrication		
NAICS Title En:	Coating, engraving, cold and heat treating and allied activities		
NAICS Title Fr:	Revêtement, gravure, traitement thermique et par le froid, et activités analogues		

NAICS Description En:

This Canadian industry comprises establishments primarily engaged in coating, engraving, heat treating and similarly processing metal. These activities often involve heating the metal, and the purpose is often to harden it. In general, the hardening of metal is included. Other activities of this industry include tempering, brazing, plating (including electroplating and re-chroming), polishing, sand-blasting and colouring metal and metal products. Establishments that perform these processes on other materials, such as plastics, in addition to metals, as well as establishments primarily engaged in plating with precious metal for the trade are included.

NAICS Description Fr:

Cette classe canadienne comprend les établissements dont l'activité principale consiste à recouvrir, graver, travailler à chaud ou traiter le métal d'autres façons semblables. Ces activités consistent souvent à chauffer le métal, en général pour le durcir. Habituellement, le durcissement du métal est compris. Parmi les autres activités de cette classe canadienne, notons le trempage, le brasage, le placage (y compris la galvanoplastie et le chromage), le polissage, le sablage et la coloration du métal et des produits métalliques. Sont inclus les établissements qui effectuent ces opérations sur d'autres matières, telles que le plastique, en plus des métaux, ainsi que les établissements dont l'activité principale consiste à appliquer des placages en métaux précieux sur des produits destinés à être vendus.

Key Indus Sector En:	Other Manufacturing		
Key Indus Sector Fr:	Autres fabrication		
NAICS Title En:	Coating, engraving, cold and heat treating and allied activities		
NAICS Title Fr:	Revêtement, gravure, traitement thermique et par le froid, et activités analogues		

NAICS Description En:

This Canadian industry comprises establishments primarily engaged in coating, engraving, heat treating and similarly processing metal. These activities often involve heating the metal, and the purpose is often to harden it. In general, the hardening of metal is included. Other activities of this industry

include tempering, brazing, plating (including electroplating and re-chroming), polishing, sand-blasting and colouring metal and metal products. Establishments that perform these processes on other materials, such as plastics, in addition to metals, as well as establishments primarily engaged in plating with precious metal for the trade are included.

NAICS Description Fr:

Cette classe canadienne comprend les établissements dont l'activité principale consiste à recouvrir, graver, travailler à chaud ou traiter le métal d'autres façons semblables. Ces activités consistent souvent à chauffer le métal, en général pour le durcir. Habituellement, le durcissement du métal est compris. Parmi les autres activités de cette classe canadienne, notons le trempage, le brasage, le placage (y compris la galvanoplastie et le chromage), le polissage, le sablage et la coloration du métal et des produits métalliques. Sont inclus les établissements qui effectuent ces opérations sur d'autres matières, telles que le plastique, en plus des métaux, ainsi que les établissements dont l'activité principale consiste à appliquer des placages en métaux précieux sur des produits destinés à être vendus.

This Canadian industry comprises establishments primarily engaged in coating, engraving, heat treating and similarly processing metal. These activities often involve heating the metal, and the purpose is often to harden it. In general, the hardening of metal is included. Other activities of this industry include tempering, brazing, plating (including electroplating and re-chroming), polishing, sand-blasting and colouring metal and metal products. Establishments that perform these processes on other materials, such as plastics, in addition to metals, as well as establishments primarily engaged in plating with precious metal for the trade are included.

NAICS Description Fr:

Cette classe canadienne comprend les établissements dont l'activité principale consiste à recouvrir, graver, travailler à chaud ou traiter d'autres façons semblables du métal. Ces activités consistent souvent à chauffer le métal, en général pour le durcir. Habituellement, le durcissement du métal est compris. Parmi les autres activités de cette classe, notons le trempage, le brasage, le placage (y compris la galvanoplastie et le chromage), le polissage, le sablage et la coloration du métal et de produits métalliques. Sont inclus les établissements qui effectuent ces opérations sur d'autres matières, telles que le plastique, en plus des métaux, ainsi que les établissements dont l'activité principale consiste à appliquer des placages en métaux précieux sur des produits destinés à être vendus.

Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2023&name=52

Waste Class: 122 C
Waste Class Name: ALKALINE WASTES - OTHER METALS

Waste Detail(s)

Waste Class: 262 L
Waste Class Name: DETERGENTS/SOAPS

Generator Info as of Dec 2024

Generator No: ON2736783

Generator Company Name:	Harmon Facades ULC (aka Sotawall)
Street:	80 VAN KIRK DRIVE
City:	BRAMPTON
Province State:	Ontario
Country:	Canada
Postal Code:	L7A1B1
Waste Class:	252 L,122 C,112 C,252 T,253 L,145 L,146 T,262 L,253 T,145 I,212 L,232 L,232 I

Waste Class Decoded:

252 - WASTE OILS & LUBRICANTS; 122 - ALKALINE WASTES - OTHER METALS; 112 - ACID WASTE - HEAVY METALS; 252 - WASTE OILS & LUBRICANTS; 253 - EMULSIFIED OILS; 145 - PAINT/PIGMENT/COATING RESIDUES; 146 - OTHER SPECIFIED INORGANICS; 262 - DETERGENTS/SOAPS; 253 - EMULSIFIED OILS; 145 - PAINT/PIGMENT/COATING RESIDUES; 212 - ALIPHATIC SOLVENTS; 232 - POLYMERIC RESINS; 232 - POLYMERIC RESINS
