## Plants of the Credit River Watershed by Region/County

This set of lists give the vascular plant, moss, liverwort and lichen species currently known for the Credit River Watershed, based on records in Credit Valley Conservation's Natural Heritage Database. The occurrence of each species is broken out for each of the four Regions/Counties that make up the Credit River watershed.

The dates given indicate the most recent confirmed record of the species in each Region/County within the last 20 years. Records older than 20 years are excluded from this list until they can be field confirmed to still be present in the watershed.

This set is made up of 4 lists:

- Vascular Plants – starts on p. 2
- Mosses – starts on p. 45
- Liverworts – starts on p. 50
- Lichens – starts on p. 51
