**WATERMAIN CONSTRUCTION
MAYFIELD ROAD
FROM MISSISSAUGA ROAD TO HURONTARIO STREET
CITY OF BRAMPTON - WARDS 2 & 6; TOWN OF CALEDON – WARD 2**

What are we doing?

- Installing various sized watermains along Mayfield Road as shown on the attached map.
- Transferring water services to the new watermain.

Why?

- To address growth in the City of Brampton and the Town of Caledon and the increased demand for water supply, distribution and storage.

When?

- We expect to start work this month at the intersection of Mississauga Road and Mayfield Road and continue east to Hurontario Street.
- The project is anticipated to be completed in the spring of 2014.
- We will start restoring the road when all water system replacements and transfers are complete, and as weather permits.

Who can you call?

Region of Peel		
Contact Person	Responsibilities	Telephone Number
Jaime Acosta, P.Eng	Project Manager	905-791-7800, ext. 7922
Troy Leyburne	Project Manager	905-791-7800, ext. 7919
Tom Graovac	Inspector	905-791-7800, ext. 3246
Cole Engineering		
Cole Engineering is the Contract Administrator and Inspector, under contract to the Region of Peel		
Contact Person	Responsibilities	Telephone Number
Matthew Eades	Contract Administrator	905-940-6161
Jody Innes	Inspector	905-940-6161
Varcon Construction will do the work, under contract to the Region of Peel		

Working Hours

- Our contractor's normal working hours are from 7 a.m. to 7 p.m. We apologize for any inconvenience this may cause, but a shorter working day would mean the project would take longer to complete.

Traffic and Parking Control

- We may need to reduce traffic speed during construction.
- We may have to reroute truck traffic and will place signs giving directions.
- On-street parking will be reduced during construction.

Driveway Access

- We may need to block your driveway for a short time. We will contact you before we do this to arrange for the best time and for alternate access, if needed. If your driveway is blocked, you may choose to park on a side street for a short time. If you need immediate access to your driveway, the contractor will have road plates available to quickly allow access in and out of your driveway.
- We will make sure businesses have access at all times.
- Please call either of the Project Managers if you have special needs related to access or business hours.

Irrigation or Sprinkler Systems

- Please tell the inspector if you have underground irrigation or a sprinkler system outside your property line.
- You may wish to move the sprinkler lines to inside your private property to avoid damage.

Trimming Trees

- If tree branches within the right-of-way interfere with construction, the contractor will have the trees pruned before equipment enters the drip line of the tree.
- If tree branches on private property interfere with construction, they will be pruned back to the nearest suitable trunk or branch.
- The contractor will ask you for permission before cutting any branches. If you do not allow the contractor onto your property to trim the branches, the branches will be cut vertically at the property line.

Interrupting Your Water Supply

- We will try to let you know 48 hours (2 days) before we need to shut off your water. Occasionally, we may have to reduce this notice to 24 hours.
- If we have to shut off your water because of an emergency, we will do everything we can to fix the problem as quickly as possible.

Vibrations

- The construction work may generate slight vibrations which may be felt in your home. As a precaution, you may consider removing or securing small, light or fragile objects from shelving and walls during the construction period.

Replacing and Taking Care of Your Sod

- The contractor will take care of any sod we replace for 30 days.
- You can help the sod to stay healthy by watering it for one hour in the early morning, two or three times a week. This is especially important in hot or dry weather.
- We will replace your sod as soon as we can, but there may be a short delay.

Repairing Your Driveway

- If we need to cut your driveway to replace the existing service valve or to gain access to the watermain, we will repair the asphalt from edge to edge across the driveway within the limits of disturbance, from the sidewalk to beyond the damaged area. Unfortunately the Region cannot completely replace your driveway.
- We will repair your driveway as soon as we can, but there may be a short delay.
- Several weeks before the driveway restoration work, we will send you an update with contact information for the contractor, in case you wish to have the remainder of your driveway (private side) paved at the same time.
- If you have any concerns, please call either of the Project Managers.

Water Service Connection Fees

- Once the watermains are installed, residents in some areas will have the opportunity to apply for a water service connection.
- Please visit peelregion.ca/pw/water/rates/connect-rates.htm to learn more about this service and the related fees.

Repairing the Road/Co-ordination with other works

- As we coordinate works with the City of Brampton and the Town of Caledon, our work may be followed by road construction and/or resurfacing. In this case our restoration may only be temporary. When the city has finished the road work they will complete a comprehensive restoration.

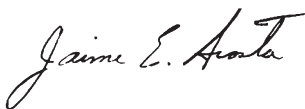

Other construction work in the area

- Watermain and sanitary sewer work has begun on Mississauga Road between Bovaird Drive West and Mayfield Road. It is anticipated to be completed by the end of 2014.

Project Updates

- Project information and a construction video is available on the Region of Peel's website at peelregion.ca/pw/construction/bram/watermain-victoria-feedermain.htm
- You can also follow the project on Twitter @peelpublicworks – hashtag (#) MayfieldRd
- The Region of Peel will always let you know if there are any major changes to the plans.
- We will try to disturb you as little as possible.
- Please call either of the Project Managers or the Inspectors if you have any issues or concerns.

Thank you!

Jaime Acosta, P.Eng
