

Burnhamthorpe Water Project

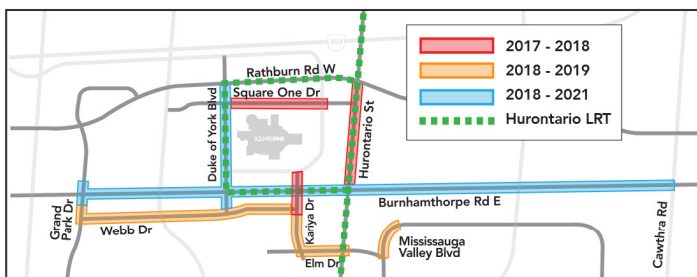

What's New?

April 16, 2019

Webb Drive and Duke of York Boulevard

What's happening at the construction compound?

- As you know, after we excavated the shaft last year, we reduced the size of the compound on Webb Drive at Duke of York Boulevard.
- The microtunnel boring machine (MTBM) is now making its way under Duke of York Boulevard from the compound on the corner of Duke of York Boulevard and Burnhamthorpe Road, and is nearly at Webb Drive.
- When it arrives, we will have to increase the size of the compound while we remove the MTBM.
- We will then reduce the size of the compound again while we construct the valve chamber inside the compound.
- Please drive carefully through the work zone, and use the proper crosswalks when crossing Webb Drive.
