

NOTICE OF STUDY COMMENCEMENT - Schedule 'C' Class Environmental Assessment Wastewater Capacity Improvements in Central Mississauga

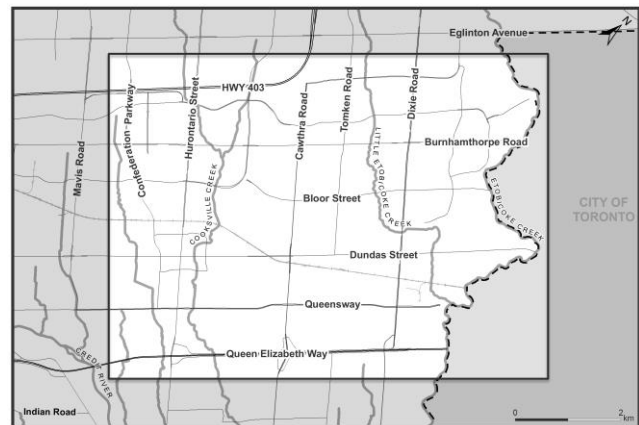

Background:

The Central Mississauga area will experience significant growth over the next 20 + years, specifically, within the Mississauga City Centre, Hurontario and Dundas Corridor (see map below). We expect these areas to grow by over 40 percent by 2041. The current wastewater infrastructure does not have available capacity to service this increased growth. That's why the Region is doing an Environmental Assessment (EA) to study how to expand the capacity of the Central Mississauga Wastewater System.

Process:

The study will follow a Schedule 'C' Class EA process, including:

- Public and agency stakeholder meetings
- Looking at ways to improve how wastewater flows through the system
- Investigating alternative long-term servicing strategies, routes and design concepts
- Confirming the preferred plan including alignments, siting, design and construction timing

Your Input is Important

The study will take approximately two years to complete. Two Public Information Centres (PICs) will be held to present the findings of the EA and to provide an opportunity to give feedback to the project team. The first meeting is planned for early winter 2020. Once completed, the results of the Study will be published in an Environmental Study Report, placed on public record for review.

For more information on the project visit the Region's website at: peelregion.ca/pw/water/enviro-assess and select *Mississauga*.

The Region of Peel is committed to ensure that all Regional services, programs and facilities are inclusive and accessible for persons with disabilities. Please contact the Project Manager if you need any disability accommodations to provide comments or feedback for this study.

This notice was first issued on May 30, 2019

With the exception of personal information, all comments will become part of the public record of the study. The study is being conducted according to the requirements of the Municipal Class Environmental Assessment, which is a planning process approved under Ontario's *Environmental Assessment Act*.
